Bunny Burrows Day One

Discuss the problems for the bunny’s burrow. Draw the problem and how you would solve it.

The problem is _________________________________.

I would fix it by _______________________________.

The problem is

I would fix it by
Bunny Burrows Day Two

In your group take your bunny into the sun. Draw and label a model of what the sun did to the bunny.

Word Bank:

<table>
<thead>
<tr>
<th>sun</th>
<th>bunny</th>
<th>burrow</th>
<th>hot</th>
</tr>
</thead>
</table>

![Sun](image1.png) ![Bunny](image2.png) ![Burrow](image3.png) ![Hot](image4.png)
Bunny Burrows Day Three

Directions: Circle the picture of the material you will use.

Shade Materials:
- Foil
- Tissues
- Wax Paper
- Sunscreen

PREDICTION:
"We got ___________ and we think the bunny will stay white change a little change a lot change a lot because ________________________________ ."

Draw your bunny’s burrow with shade materials.
Bunny Burrows Day Four

RESULTS:
Our structure caused the beads to:
- stay white
- change a little
- change a lot
- change a lot

Label your bunny burrow with your result.
Parade by all the burrows to look for patterns.

_______________________________ was good for the bullet because_______________________________.

Discussion:

What do the burrows that stayed white have in common?

What do the burrows that changed have in common?

Prediction: What would happen if we covered the burrow in leaves?
