Mission Statement

The department of Chemistry and Biochemistry at UCSB is dedicated to performing cutting edge chemical and biochemical research in an environmentally and ethically sound manner, in service to the county of Santa Barbara, the state of California, and the world. We are committed to addressing the grand challenges that humanity faces in the 21st century and believe that chemistry and biochemistry are at the forefront of this endeavor. In accord with this mission we strive towards excellence in undergraduate, graduate, and outreach education, and we will instill in our graduates the skills and drive necessary to meet these challenges.

I. INTRODUCTION

The 2012-2013 Department of Chemistry and Biochemistry (DCB) Graduate Program Handbook is designed to be used in conjunction with Graduate Division’s Graduate Handbook for detailed requirements, policies, and procedures specific to the University and to the DCB Graduate Program. Every attempt has been made to ensure that the information in this handbook is current and correct as of its preparation date (August 2012). It is each student’s responsibility to confirm the deadlines, requirements, and paperwork that apply to his/her degree program at each step in the graduate school process.

II. DEPARTMENTAL ADMINISTRATION AND CONTACT INFORMATION

The DCB Chairperson is responsible for the administration of the teaching, research, and service functions of the Department. The Vice-Chairperson, the members of the Executive Committee, and the Management Services Officer (or Business Manager), who is the chief administrator for the staff, work closely with the Chairperson.

Policies and procedures for the department are developed through a consultative process utilizing input from various departmental standing committees, faculty, staff and students. DCB policies and procedures are developed and maintained in accordance with campus and university-wide policies and procedures, such as those set forth by the Graduate Council and the Graduate Division. The Graduate Council is an Academic Senate committee with jurisdiction over graduate education. Supervised by the Graduate Dean, the Graduate Division carries out the directives of the Graduate Council.

**Chairperson**

Dr. Rick Dahlquist  
Chemistry, Room 1126C  
dahlquist@chem.ucsb.edu

D. Department Services

**Department Email Address and Wireless Access:** All DCB graduate students are required to obtain a Chemistry email account (typically your first initial and last name @chem.ucsb.edu). We will use this account as our primary way of contacting you and sending out important announcements and information. Please be sure to check your chem account regularly. A complete list of current graduate student email addresses is posted on the DCB web page under “People – Grad Students”. To establish an email account, complete the [Email Account Application](#) and submit it to Jennifer Mehl or the IT Student Assistants (PSBN 2622). The IT team will set up your account, establish your access to the wireless network, distribute information on how to use email, and answer questions.

**Mail and Mailboxes:** You will be assigned a mailbox in PSBN 1512. The mailbox is for departmental notices, campus mail, and professional mail that pertain to your role as a graduate student. Personal mail should be received at your home address. Mail is delivered to the Department at approximately 8:00am Monday through Friday and is typically distributed to your mailbox by 9:30am. You are expected to check your mail regularly. Mail that is left for more than 30 days or that does not fit in your mailbox will be recycled. Please note that paychecks will not be placed in your mailbox and should be picked up from Pat Walker in Building 232.
Faculty and staff mailboxes are located in Building 232, Room 1010. Items for faculty and staff mailboxes should be left with the Student Assistant at the Front Desk for distribution.

Outgoing mail bins for campus and U.S. mail are located in the Entryway of the Main Office. Campus mail should include the recipient's name, department, and mail code (available at the Building 232 Front Desk). Please be sure to include the recipient's complete address and your return address on off-campus U.S. mail. Mail to foreign addresses that is not a standard-sized letter must have a Customs Form attached or it will be returned to the Department. Custom Forms are available from Mail Services. Departmental mail does not require postage. Mail Services does not pick up personal mail.

**Copiers:** The copy machine located in PSBN 1512 is for graduate student use. It requires a five-digit code for recharge purposes. Use the code assigned to your Research Advisor when copying research materials. When copying course or teaching materials for your work as a Teaching Assistant or Reader (i.e. syllabi, exams, quizzes, class handouts, etc.), please use the departmental office code assigned for coursework. The code may be obtained from the Front Desk in the Main Office in Building 232.

If you experience functional problems with the copier in PSBN 1512 (i.e. paper jam, paper outage, error message, etc.), please call the Main Office at (805) 893-5675 or notify the Student Assistant at the Front Desk as soon as possible. The Student Affairs staff will repair the copier. In cases where the copier is irreparable or your copy job is urgent, the Student Affairs staff will assist you with your copy job in the Main Office. The Student Affairs staff is available for copier repairs and assistance during regular office hours only.

**Fax Machine:** The departmental FAX machine is located in the Main Office, Building 232, Room 1010. Instructions are located on the wall above the machine. Please ask the Student Assistant at the Front Desk for assistance. You need to know the account number assigned to your research advisor for recharge purposes. If you receive a FAX or confirmation that a FAX was sent by you, it will be placed in your mailbox. The FAX number is (805) 893-4120.

**Keys:** Ericka James (Building 232, Room 1003) issues keys. First-year students will be issued keys to the buildings, general TA office space, and appropriate teaching laboratories in PSBN. After you have selected a research advisor and submitted the “Graduate Petition to Select Research Advisor” (with required approvals) to the Staff Graduate Program Advisor, you may contact Ericka to request keys to that lab. When you move into a research laboratory, your key to the general TA office space must be returned. Keys to the teaching labs must be returned at the end of each quarter or upon completion of your TA duties for that year. **Upon termination of enrollment in the DCB graduate program, you must return all departmental keys to Ericka James. You will be billed $20.00 per unreturned key through the campus BA/RC system.**

**Room Reservations:** The DCB maintains three departmental meeting rooms in the Chemistry and Physical Sciences North Buildings for use by reservation. These rooms are intended primarily for academic events involving members of the DCB or other campus departments and programs. Please use the online room reservation system to view the availability calendar or reserve Chemistry 1005D, PSBN 1631, or PSBN 4606. Mira Lazaro maintains the room reservation calendar. If you use these facilities, you are responsible for leaving them clean, in original configuration, dark, and securely locked.
**Email List-Serve:** As a graduate student in the DCB, your chem email address will be added to the chem-grads list-serve. Messages sent to chem-grads go to all graduate students in the DCB. When you receive chem-grads messages, it is important to review them carefully, as academic and department-related reminders and announcements will frequently be sent via the chem-grads list-serve. Jobs, fellowships, and other academic opportunities that may be of interest to current graduate students will also be sent via this list-serve.

**Facebook Group:** All current graduate students and alumni are welcome and encouraged to join the UCSB Department of Chemistry and Biochemistry Graduate Program Facebook group. This forum can be used to advertise and plan upcoming graduate events, share housing opportunities, post photos, and announce other social or personal information to grad students in the DCB. Students who wish to view or post this type of information or otherwise participate in non-academic networking should opt-in to the group.

### III. GRADUATE DEGREE PROGRAMS

The DCB graduate program offers Master of Science (M.S.), Master of Arts (M.A.), and Doctor of Philosophy (Ph.D.) degrees. Upon admission, students are expected to pursue the Ph.D. program, but may add or switch to the M.S. or M.A. programs at a later date if necessitated by individual circumstances. Students select one of the five traditional program areas (Biochemistry, Inorganic Chemistry, Materials Chemistry, Organic Chemistry, or Physical Chemistry) upon selection of a research advisor, but interdisciplinary research and exploration is common and strongly encouraged.

The degree requirements for the graduate programs listed below are intended to be flexible so that the program can be tailored as much as possible to the needs and interests of the students. Degree requirements are sometimes altered to accommodate for technical, academic, or administrative changes. However, students are held to the requirements in effect when they enter the DCB graduate program unless they obtain an approved exception request.

#### A. Doctor of Philosophy Requirements and Policies

(1.) **Graduate Coursework (18.0 Units Total):** It is expected that a student in the Ph.D. program will pursue a program of study providing: (1) depth of knowledge in a technical specialty area; and (2) breadth of knowledge in two or more technical areas distinct from, but supportive of, the technical specialty area. The breadth of knowledge should involve concepts different from those of the specialty area. Students will normally demonstrate substantial satisfaction of depth and breadth requirements through the successful completion of regular course work.

Normally, doctoral students are expected to take all available DCB graduate courses in their area of interest, which are deemed relevant to their programs, as well as courses outside their area for breadth. Approved courses in other departments are encouraged in the interest of greater breadth. It is also anticipated that it will be necessary or desirable for many students to complete 100-series (undergraduate) courses, both for added breadth and as preparation for more advanced courses. Most students take all courses in the first year, typically two 3-unit courses per quarter. A grade of
B or better in each course is required and a cumulative grade point average of 3.0 must be maintained.

**Recommended Course Planning:** The recommended courses for each of the 5 areas are established by the Area Advisor at the time the student enters the program. Students will meet with the Area Advisor during New Grad Academic Training (NGAT) to plan coursework for the year. When undergraduate or remedial background courses are stipulated, some of the first year required courses may be delayed until the second year. The first year curriculum (18 units) must be completed before the Advancement to Candidacy Oral Examination, but additional or supplemental coursework may be completed after the Oral Exam. The following are some example courses by area:

- **Biochemistry Area:** Chem 226, Chem 234, Chemistry courses numbered 241-256, Chem 259, Chem 261, Chem 262AB, Chem 281, and selected BMSE courses
- **Inorganic/Analytical Area:** Chem 268AB and Chemistry courses numbered 270-279
- **Materials Area:** Chem 240, Chem 265, Chem 274, Chem 282ABC, Chem 285, and selected Chemistry courses and Materials courses chosen in consultation with the Area Advisor
- **Organic Area:** Chem 224, Chemistry courses numbered 226-233, Chem 239, Chem 240, Chem 257, Chem 258, and Chem 263. Students are also expected to participate in Chem 223 regularly, though it does not apply toward the 18 required units.
- **Physical Area:** Chemistry courses numbered 217-222, Chem 225, and selected Chemistry courses chosen in consultation with the Area Advisor

**(2.) Teaching Requirement:** Students are required to teach a minimum of 3 quarters, but no more than 9 quarters total during their stay in the graduate program. Most students teach all of the first year and on average 4-6 quarters total. Exposure to teaching is valued as an essential skill to be gained in graduate school. Refer to Section V-C (Financial and Employment Matters – Teaching Assistantships) for additional details on Teaching Assistant positions.

**(3.) Annual Thesis Committee Meetings:** The student will meet with all thesis committee members collectively at least once per year to discuss and reflect on progress and future plans in the program, receive input and feedback, and present any concerns or potential issues that you may have. Students are required to establish the thesis committee no later than the end of the first year (See 5. Advancement to Candidacy Exam – Candidacy and Thesis Committee for details). All new students must also meet with the Department Chair individually at the end of winter quarter of the first year. The student’s primary advisor should provide a written statement to the Chair at least one week in advance of this meeting. The student will complete a first year meeting questionnaire for discussion during the meeting.

*Meeting Scheduling:* The student must schedule the first meeting with the committee to take place no later than fall quarter of the second year. Students may find online room scheduling and Doodle polling to be useful tools when scheduling these meetings. At least one hour should be allocated for each meeting (except the oral exam and final defense, which require 2 hours). The Advancement to Candidacy Oral Examination will constitute the second meeting and should take place no later than the fall quarter following the second year. Meetings in the third and fourth year must be completed by the end of the spring quarter. The Final Defense of the Dissertation will constitute the fifth meeting and should occur no later than the fall quarter following the fifth year. Annual meetings will continue to be required in any additional years that the student remains enrolled at UCSB, with the final meeting being the Final Defense of the Dissertation. The student or PI can call an additional or earlier meeting at any time to address issues that may arise.
Meeting Structure: The committee should remain the same unless there is a need to change members. Changes to the committee require the approval of the Department Chair. At least 3 of the 4 faculty committee members (including the PI) must be present, though additional faculty members can be present if desired. The PI will be excused at the mid-point of the meeting and discussion will continue amongst the student and remaining committee members. The student must submit a written progress report (approximately 2 pages in length) and current CV to the committee for review at least one week in advance. You should be prepared to present your work to the committee, discuss potential issues, and receive feedback from the committee. The student is required to obtain the signatures of all committee members present & submit the signature form with progress report, CV, and faculty comments to the Staff Graduate Program Advisor (all components must be submitted for the requirement to be considered complete). The signature and comments of the PI will also be required (the PI should refer to the Primary Research Advisor section of the signature form).

(4.) Seminar Requirement (Chemistry 290): A grade of B or better must be achieved in Chemistry 290, which requires delivery of a seminar related to your group’s research. This requirement must be completed before taking the Advancement to Candidacy Oral Exam.

(5.) Advancement to Candidacy Exam: The Candidacy Oral Examination is based primarily on the student's dissertation research field and is administered by the student's Candidacy Oral Committee, which is formally established with the approval of the Graduate Division. The purpose of the exam is to test whether the student is adequately prepared to carry out an original dissertation research project. The student’s performance will be evaluated on the basis of demonstrated understanding of the research field, general knowledge of the discipline, and on the research work completed by the time of the exam. A written component may also be required at the request of the committee. All Ph.D. course requirements must be fulfilled before taking the advancement to candidacy exam (18 units of graduate level courses chosen in consultation with the faculty advisor and completed with a letter grade of B or better and Chemistry 290 with a grade of B or better). The examination should be taken by the end of the sixth quarter, normally the Spring quarter of the second year. All students must complete the exam no later than the end of the fall quarter following the second year. If the exam is failed, the student will have one opportunity to repeat.

Candidacy and Thesis Committees: The Advancement to Candidacy Committee and Thesis/Dissertation Committee members should be selected by the end of the first year. The student, with the advice of the Research Advisor, is responsible for proposing a committee and asking those faculty members if they are willing to serve on the committee. PhD committees require a minimum of 3 UC ladder faculty, 2 faculty members (including Chair) must be in the home department and in the student’s area of research and one faculty member must be from another research area. The Research Advisor (or joint advisors) may serve on the committee, but his or her presence is not counted in the required number of faculty members described above. The Research Advisor will serve as Chair of the final defense and thesis/dissertation committee. When appropriate, a member from another department may be appointed to the committee. The proposed committee is submitted to the Staff Graduate Program Advisor, together with a tentative title of the dissertation, for approval by the Faculty Graduate Advisor. Questions concerning the appropriateness of committee member selections should be directed to the Faculty Graduate Advisor. Once the committee and a tentative title have been approved at the department level, the Staff Graduate Program Advisor will submit the information to the Graduate Division for final approval.
By Graduate Council regulation along with the formation of the Candidacy Oral Committee, it is required that students complete and have their research advisor sign the Graduate Student Conflict of Interest form and return it to the Staff Graduate Program Advisor for submission to the Graduate Division. Graduate Division forms are available for download online.

Oral Examination: By Graduate Council regulation, the Graduate Division requires at least two weeks’ notice of the time and location of the oral examination. Once a day and time has been agreed upon by all members of the committee you must schedule a room for your candidacy exam and notify the Staff Graduate Program Advisor via email immediately for submission of the proper paperwork to the Graduate Division. Room reservations are made online. Send the Staff Graduate Program Advisor the following information at least two weeks in advance of your exam: Tentative Dissertation Title; Committee Members (indicate chair); Date, Time, and Location of your exam. Any changes in the membership of your committee must be arranged through the Staff Graduate Program Advisor for approval by the Faculty Graduate Program Advisor.

After the oral examination, the Candidacy Oral Committee reports the results of the examination to the Staff Graduate Program Advisor who will forward the required forms to the Graduate Division. When the oral examination is passed, the student must pay the $50 advancement to candidacy fee at the Cashier’s Office (1212 SAASB), obtain two receipts and take them to the Graduate Division (3117 Cheadle Hall). The student is then advanced to candidacy, effective the first quarter following the exam in which the student is registered (students completing the exam in the fall will be advanced for winter, students taking the exam in the winter will be advanced for spring, etc.).

(6.) Original Research Proposal Exam: The proposal exam consists of written and oral parts as described below. The topic of the proposal exam must be original research not related to your or your colleagues’ research. A topic and a proposal title must be approved by at least two DCB faculty members (excluding your Primary Research Advisor) in addition to the Area Advisor. The selected faculty members must sign the topic approval form and this form must be returned to the Area Advisor before you can proceed with the proposal writing. Students should obtain the approval of faculty who are familiar with the proposed research topic. The written portion of the proposal must be emailed to the Area Advisor at least two weeks prior to the oral examination. The Area Advisor will gather a committee for you and will inform you of the date, time, and location of the exam. The original research proposal exam should be completed in the third year. The Proposal Exam Preparation course is recommended, but not required.

Proposal format: The written proposal should follow the NSF, NIH, ACS, or PRF standard guidelines: 6-15 numbered pages for the proposed research section, single sided and font size of 11pt or larger. See examples at the following links:

- NSF Grant Proposal Guide
- NIH Research Grants and Fellowships Guidelines
- ACS Grants
- ACS Petroleum Research Fund

Oral presentation and Evaluation: Each student will be given approximately 20 min for the oral presentation, which will be followed by approximately 10 min of questioning. Students may utilize slides, chalkboards, or digital media to aid the presentation. The committee will have a short discussion immediately after the presentation, and provide the student with feedback and the
results of their assessment (pass, fail, or conditional pass). The result will be based on: originality and significance, evidence that background material has been covered, clarity and quality of writing, feasibility of proposed experiments, creativity, oral presentation performance (organization, clarity), and adequacy of responses to questions. If the proposition is considered inadequate, the student will be allowed one or two weeks to address weaknesses and provide a revised proposition in a written format or will be required to schedule a new oral exam with a different topic in the following year.

(7.) **Dissertation:** The dissertation is written on a subject chosen by the candidate that is related to an area of study in the DCB. It must be of such nature as to enable the student to demonstrate his or her ability to carry out independent investigation and study. In a public presentation, the candidate will defend the dissertation before the Dissertation Committee approves it. After approval, the dissertation must be typed according to the rules set forth in the *Guide to Filing Theses and Dissertations*. Graduate Council has established guidelines for the formatting of dissertations in order to ensure uniformity for manuscripts that are archived in the UCSB Library, as well as to ensure the widest possible dissemination of graduate student research. Students should consult the *Guide to Filing* for detailed instructions on filing the dissertation with Graduate Division.

*Final Defense and Dissertation/Thesis Committee:* The Dissertation Committee (Thesis Committee) is also a formal committee of the Graduate Division that usually consists of the advancement to candidacy exam committee with the Research Advisor as chair. The committee must be comprised of at least 3 ladder faculty in the department. A change in committee composition can be made at any time, but students should contact the Staff Graduate Program Advisor so that the appropriate paperwork can be submitted to Graduate Division (committee changes require a Form 1-A). Students should provide committee members with a completed dissertation for review and comments well before filing their degree.

*Departmental Dissertation Submission:* The department requires a digital copy of your dissertation with an original signature page or a copy of the original signature page, which should be dropped off in the Staff Graduate Program Advisor’s office (either digital or hard copies of the signature page are acceptable). Additional copies for yourself, your lab, and/or your advisor may be submitted to the Staff Graduate Program Advisor for binding at a cost of $31 per copy (checks are payable to UC Regents) or ordered via ProQuest.

(8.) **Final Oral Examination:** For the Defense of the Dissertation, the candidate must defend his or her work before the Dissertation Committee and give a one-hour public seminar presentation. Ordinarily, the public presentation is considered part of the Examination. The Committee will meet with the student after the Examination to discuss any areas that need revision or additional work.

The dissertation must have preliminary approval of all members of the Ph.D. Committee before the final oral presentation is scheduled. The student must advertise the defense by emailing the Staff Graduate Program Advisor to request that an announcement be forwarded to all members of the Department. The student may also post fliers in common areas throughout the Department. The student should contact the DCB Staff Graduate Program Advisor via email and verify that all forms are in order at least one week in advance of the defense date. The student must provide the following information at that time: the day, time, and location of the defense, any changes to the dissertation committee, the title of the dissertation, and an abstract of the dissertation.
After the final defense, the Dissertation Committee Chair reports the results of the defense to the Staff Graduate Program Advisor via a Form III, which is then forwarded to the Graduate Division. The student should also submit Departmental Exit Survey information to the Staff Graduate Program Advisor, submit employment separation paperwork to the Payroll and Personnel Analyst, and consult the Graduate Division for additional final steps.

B. Master of Science Requirements and Policies

(1.) 30 Graduate Units: At least 30 units of upper-division and graduate courses must be completed, including no fewer than 20 units in graduate courses (those numbered 200+) in the major subject or in graduate courses related to that subject as approved by the departmental graduate advisor. At least 18 of the 30 units must be in 200–289 level courses and no more than 10 of the 30 units may be in Chem 596. **All courses must be completed with a grade of B or better.** Courses must be approved by the faculty Area Advisor in order to ensure appropriate breadth and degree of specialization. **Under no circumstances** will units completed in courses numbered either 501-A-B-C, 597, 598, or 599 be used to satisfy any of the university minimum requirements.

(2.) Seminar Requirement (Chemistry 290): A grade of B or better must be achieved in Chemistry 290, which requires delivery of a seminar related to your group’s research. If continuing in the Ph.D. program, this requirement must be completed before taking the Advancement to Candidacy Oral Exam.

(3.) Master’s Thesis: A master's thesis is patterned after a Ph.D. dissertation but on a scaled-down level of originality and length. The thesis should be typed in draft form for the Committee. After the Committee approves it, it should be typed in the format set forth in the Guide to Filing Theses and Dissertations. A public seminar presentation is not required for thesis defense. However, the thesis must make a significant contribution. Publishable results are encouraged but not required. Some examples of the types of projects suitable for M.S. theses are the following:
   a. An advanced design project, either analytical or experimental;
   b. An experimental or theoretical contribution to a research problem currently investigated within the Department;
   c. A critical evaluation of the state-of-the-art of a current research area, going beyond mere literature compilation;
   d. A critical theoretical analysis or a preliminary experimental study intended as a feasibility study or precursor laying the groundwork for more advanced Ph.D.-level research.

Thesis Committee: A **Thesis Advisor** (typically the student’s research advisor) must supervise the thesis and a **Thesis Committee** must approve it. The Thesis Committee shall consist of the Thesis Advisor and at least two additional faculty members chosen by the student and approved by the Thesis Advisor, by the Departmental Faculty Graduate Advisor, and by the Graduate Dean. The Committee must have at least three ladder faculty (not temporary faculty), two of whom must be from the department and in the area of specialization; the third faculty member must be from another area of specialization and may be from another department. At the Department’s discretion, a non-ladder faculty member may serve as a fourth committee member. It is the responsibility of the student to find a faculty member willing to supervise the thesis and a Thesis Committee willing to serve. The Department does not guarantee that such an Advisor and
Committee can be found, or that the thesis can be completed within any specified time.

C. Master of Arts Requirements and Policies

(1.) 36 Graduate Units: At least 36 units of upper-division and graduate courses must be completed, including no fewer than 24 units in graduate courses (those numbered 200+) in the major subject or in graduate courses related to that subject as approved by the departmental graduate advisor. At least 20 of the 36 units must be in 200 – 289 level courses and no more than 12 of the 30 units may be in Chem 596. **All courses must be completed with a grade of B or better.** Courses must be approved by the faculty Area Advisor in order to ensure appropriate breadth and degree of specialization. **Under no circumstances** will units completed in courses numbered either 501-A-B-C, 597, 598, or 599 be used to satisfy any of the university minimum requirements.

(2.) Seminar Requirement (Chemistry 290): A grade of B or better must be achieved in Chemistry 290, which requires delivery of a seminar related to your group’s research. If continuing in the Ph.D. program, this requirement must be completed before taking the Advancement to Candidacy Oral Exam.

(3.) Comprehensive Final Exam: The Comprehensive Examination for the M.A. Degree is generally taken the quarter in which the student plans to graduate officially, and only if his or her cumulative GPA is 3.0 or above. The different program areas have slightly different formats for the exam; please consult with the Area Advisor. **The student is in charge of scheduling the exam.** For students who **fail the comprehensive examination** on the first try, the decision to allow a second try is at the discretion of the Examination Committee.

The exam is administered by a committee of faculty members, called the **Examination Committee for the Degree of Master of Arts**, who are selected by the student. The Faculty Graduate Advisor should approve the student’s selections no later than the beginning of the quarter in which she or he expects to receive the M.A. degree. This is done through the DCB Graduate Student Office. The Committee must have at least three ladder faculty (not temporary faculty), two of whom must be from the department and in the area of specialization; the third faculty member may be from another department and area of specialization. At the Department’s discretion, a non-ladder faculty member may serve as a fourth committee member.

D. Substitutions and Exceptions to Degree Requirements and Policies

Substitutions and exceptions to Departmental requirements and policies may be requested via the **DCB Graduate Student Degree Requirements Petition**. The nature of the request will determine which approvals are required, but may include any or all of the following: course instructor (especially in the case of course substitution requests), research advisor, area advisor, faculty graduate advisor, and department chair. Students should discuss degree requirement substitution and exception requests with the Staff Graduate Advisor prior to completing the petition.

**Approval of departmental faculty members via this petition does not constitute approval of the Graduate Division, Office of the Registrar, or other campus offices.** Students granted a
waiver or substitution of departmental requirements by faculty within the department are not exempt from any Graduate Division requirements. Students wishing to request an exception to Graduate Division requirements or policy should consult the Graduate Policies and Procedures Handbook and discuss their unique situation with the Staff Graduate Program Advisor.

IV. GENERAL ACADEMIC POLICIES AND PROCEDURES

Campus-wide academic policies and procedures are set forth by the Academic Senate's Graduate Council and the Graduate Division. These policies apply to all graduate students. Additional policies and procedures are established by the Department in consultation with the Graduate Council and apply only to students in DCB graduate programs. Official campus-wide policies can be referenced via the General Catalog, the Office of the Registrar, and the Graduate Division.

A. Academic Advising

The choice of a program of study is primarily that of the student, but advisors are available to provide support and guidance at any time and should be consulted at each stage of graduate study for academic advising. In addition to the advisors described below, students may approach any member of the faculty for advice, direction, or answers to questions. Students are required to meet with the members of the thesis/dissertation committee at least once per year for progress checks and are encouraged to do so more frequently for additional discussion and feedback.

Staff Graduate Program Advisor: Mallarie Stevens, x2638, Building 232, Room 1001
The Staff Graduate Program Advisor helps in the recruitment of new graduate students, degree evaluations and progress checks, personal counseling and referral, and career resource guidance. The Staff Advisor is the first point of contact for all graduate students in need of advising and provides assistance with graduate program administrative tasks. You should inform the Staff Advisor of leaves, oral exam scheduling, final defense scheduling, concerns or conflicts, and any other questions or issues that may arise during your studies. The Staff Graduate Program Advisor also serves as the Student Affairs Manager, responsible for the operation and development of all DCB student affairs.

Faculty Graduate Advisor: Dr. Mattanjah de Vries, x5921, Chemistry, Room 4221
The Department's Faculty Graduate Advisor, who is appointed by the Dean of the Graduate Division on the recommendation of the Department Chair, deals with all graduate matters affecting the Department and represents the Department in dealings with the Graduate Division. The Faculty Graduate Advisor serves as chair of the Area Advisors Committee and may be consulted for academic advising throughout your program of study. Forms and petitions requiring the signature of the Departmental Graduate Advisor must be signed by Professor de Vries.

Area Advisors Committee: Dr. Luc Jaeger (Biochemistry), Dr. Trevor Hayton (Inorganic), Dr. Gui Bazan (Materials), Dr. Liming Zhang (Organic), and Dr. Steven Buratto (Physical); The Faculty Area Advisors are available for consultation and guidance in course selection and matters related to the student's technical program. All students are required to meet with the designated Area Advisor during New Grad Academic Training for initial academic advising. Until you have selected a primary research advisor, you should continue to consult the Area Advisor concerning
programs of study. The Area Advisors remain available for advising and consultation throughout your program of study and may be required to sign certain departmental forms and petitions.

**Primary Research Advisor:** Once you have selected a Primary Research Advisor and formally joined his or her group, he or she should be consulted about your program of study. The Primary Research Advisor will serve as your supervisor, teacher, and mentor at each stage of degree completion.

### B. Selecting a Research Area and Advisor

**Active Exploration Requirement:** Participation in at least 3 research groups (attendance at a minimum of 3 group meetings, a multi-week lab rotation including collaboration on a project, or other forms of active exploration) is required before selecting a Primary Research Advisor. Students are also encouraged to interview additional members of the faculty with whom they share research interests and to participate in additional research group rotations if desired. Students are not obligated to make a commitment to a particular professor prior to their second quarter and prior to completion of the interview and rotation processes. This is true even in cases where a student has worked for and been paid by a particular professor during the preceding summer.

**Area and Advisor Selection:** In order to remain in good academic standing, students are required to formally join a research group by the end of their second quarter (by submitting the [Petition to Select Research Advisor](#)), but not sooner than December 1st of their first year. The choice of research advisor is one of the most important decisions made in graduate school. For this reason, students are strongly encouraged to take the time to consider this decision carefully in order to make the best choices for themselves. Student choices made too soon, with inadequate information, or from a feeling of obligation may negatively impact the student's graduate career. Thus, students should consider all options and make an informed decision that is mutually agreed upon by both student and research advisor.

The choice of research advisor is not an absolute commitment. If the original choice is not ultimately the perfect match, students are permitted to switch groups. However, because this can cause a student’s time to degree to be significantly delayed, this situation should be avoided when possible. Students intending to switch groups must complete the petition process, but are not required to complete additional rotations or interviews.

### C. Changing Degree Objective

Students who are in the Ph.D. program at UCSB and wish to change their degree objective to the Master of Science or Master of Arts should discuss their prospects with the Faculty Graduate Advisor and their Research Advisor. If, after receiving advice and encouragement, a student wishes to change the degree objective to the M.S. or M.A. program, he or she should obtain a [Change of Degree Status petition](#) from the DCB Student Affairs Office to add the M.S. or M.A. degree objective and remove the Ph.D. degree objective. With the approval of the Research Advisor and the Faculty Graduate Advisor, students may also petition to add the M.S. or M.A. and continue in the Ph.D. program. Students selecting this option should consult the Staff Graduate Advisor concerning completion of degree requirements.
D. Registration Process

Students register for classes via the GOLD (Gaucho On-Line Data) system. Complete instructions for using GOLD are available via the Office of the Registrar’s web site. **It is your responsibility to consult GOLD each academic quarter for your pass time registration schedule and note any applicable deadlines concerning registration and enrollment.**

It is essential that students register for courses on time. If students foresee a problem with doing so, they should contact the DCB Staff Graduate Advisor for help. All DCB graduate students are expected to maintain a course load of at least 12 units each academic quarter. Students who do not enroll in at least 8 units by the posted deadline may incur a $50 fee for late registration. Students who have not registered for at least 8 units by the start of the quarter will risk becoming ineligible for financial support, being denied access to student services, and falling into lapsed student status.

E. Verification of Graduate Student or Employment Status

Students requiring verification of enrollment, student status, employment status, or financial support for housing, visa, student loans, childcare or other personal reasons may request a letter from the DCB Student Affairs Office. All requests must be made at least one week in advance of the date that the verification letter is needed and must be made by the student him or herself. Information will not be disclosed to third parties, such as building managers or loan officers, without the advance permission of the student and clear indication of to whom information may be disclosed. Letters should be picked up from the Student Affairs Office during regular business hours on or after the agreed upon date. Employment verifications are also available via At Your Service.

F. Grades

The General Catalog should be consulted for complete information and policy concerning UCSB’s grading system.

**Grade Point Average:** The Graduate Division will place you on probation if you fall below a cumulative grade point average (GPA) of at least 3.0 (B). If you do not achieve a cumulative GPA of at least 3.0 in the subsequent quarter, you are subject to dismissal. Students placed on probation may become ineligible for financial support, including but not limited to, employment as a TA or GSR, fellowships, and traineeships.

**Satisfactory/Unsatisfactory:** DCB graduate students may take certain graduate courses on a satisfactory/unsatisfactory (S/U) basis provided that the course is so offered and that the Area Advisor or Primary Research Advisor approves. S grades will be assigned for coursework equivalent to a B or better on the letter-grade basis. U grades will be assigned for work equivalent to a B- or below. Core courses applicable to the 18-unit PhD coursework requirement must be taken for a letter grade. For M.S. or M.A. degree candidates, all courses applicable to the unit requirement must be taken for a letter grade, including research units.
Incompletes: A grade of Incomplete (I) may be placed on a student’s record only with a completed Petition for an Incomplete Grade. The petition must indicate the reason for assigning the I grade, the student’s grade at that point, the nature of the coursework to be completed, the percentage of the final grade to be based on that work, and the deadline for submitting the work. The petition must be approved and signed by the instructor in charge of the course and must be filed with the Office of the Registrar by the last day of the quarter. There is a $5 processing fee for each petition filed.

The work for the incomplete course must be completed and the grade of I removed by the end of the next full quarter (or by an earlier date if specified on the form). If the work is not completed by the deadline or its authorized extension, the grade of I will be converted automatically to a grade of F or U, as appropriate. A student may not repeat a course in which an incomplete was assigned and therefore may not register for the course a second time in order to remove the grade of I. The Chair of the Department in which the course was offered has the authority to extend the deadline for completion of incompletes in the event of unusual circumstances.

G. Leaves of Absence

Graduate students dealing with extraordinary circumstances may petition for a leave of absence. The leave policy stipulates the following categories of leave:

- Medical/Health Difficulties
- Pregnancy/Parenting Needs
- Family Emergency Leave
- Military Leave
- Filing Quarter Leave

The deadline for filing a leave of absence for a particular quarter is posted on the Graduate Division Calendar. Petitions, Frequently Asked Questions, and additional information are available via the Graduate Division Graduate Handbook. Foreign students are encouraged to talk with the Office of International Students and Scholars (OISS) before applying for leaves, to avoid any subsequent visa issues. A student may not hold a University fellowship, teaching assistantship, graduate student researcher, or any student appointment title while on leave.

H. In Absentia Registration

If you must remain registered, but your research or study requires you to remain outside California for the duration of a quarter, you may be eligible for in absentia registration. Students who are approved for in absentia registration will receive a reduction of 85% of the combined registration, educational, and campus fees. You are responsible for all other fees, notably nonresident tuition and student health insurance. Students should submit a Request for In Absentia Registration petition with faculty verification of the need to be outside of California, to Graduate Division by the posted deadline. You are responsible for registration.
I. Intercampus Exchange Program

A graduate student in good standing who has completed at least one quarter of residence at UCSB and who wishes to study temporarily at another UC campus may apply for the Intercampus Exchange Program for Graduate Students (IEPGS) by obtaining the approval of the Faculty Graduate Advisor, the Chair of the host Department, and the Graduate Deans on both campuses. The program enables the student to maintain academic residence at UCSB without being physically present.

Approval is given only when there is an excellent reason for making the request and the student is in good academic standing. Examples of “excellent reasons” include enrollment in specific course offerings not available at UCSB or access to a specialist in the student's field whose guidance is not available at UCSB.

Separate applications are required for each quarter and must be filed with the UCSB Graduate Division at least six weeks prior to the start of the quarter in which the student wishes to take advantage of this privilege. The student pays fees only at UCSB, but registers at both the home campus and the host campus. The DCB Student Affairs Office will assist the student in filing the UCSB forms. The student should obtain a class schedule from the host campus in order to learn registration procedures and deadlines for that campus.

J. English for Multilingual Students (EMS) Requirement

It is a University requirement, enforced by the Department of Chemistry and Biochemistry, that foreign students for whom English is not the native language attain proficiency in English before a degree will be awarded. These students are required to take an English Language Placement Exam (ELPE) during New Grad Academic Training at the start of the first fall quarter. The results of the examination are used to place students in appropriate language classes or to exempt them from taking more English courses. Although requirements are normally satisfied in three quarters or less, some students are required to continue in the program for additional quarters. The DCB will require that such students enroll in the indicated course(s) each quarter until exempted from further studies.

Students receiving EMS course placements, either as a result of the ELPE or the TA Language Evaluation, are recommended to complete those placements at the earliest possible time. Students with incomplete EMS oral requirements will be ineligible for employment as a Teaching Assistant until these requirements are complete. A student may not file a petition for a Filing Fee Leave of Absence status if they have an incomplete written or oral EMS placement.

K. Attendance at Colloquia and Seminars

The Department presents colloquia and seminars on technical subjects of current interest at least once per week. The speakers at these seminars are usually distinguished guests from other academic institutions or industrial research organizations, faculty, or advanced graduate students. The DCB recognizes the value of such presentations to a professional Chemistry education and
expects the attendance of its graduate students at seminars for which the topic is relevant to the student’s technical area.

DCB seminars for the upcoming week are announced via the chem-seminars list-serve. All members of the DCB with a chem email address are automatically subscribed. The seminar calendar can also be viewed online. In addition, DCB graduate students are welcome and encouraged to attend seminars and lectures hosted by other departments. Event schedules are available at the following links.

L. Commencement, Transcripts, and Diplomas

Commencement: Commencement ceremonies are held once per year in June. Students who officially finished their graduate programs in December, March, or June, or who will finish during the upcoming summer or fall quarters may participate in the June ceremony. This is a ceremony only; no diplomas are presented. Online registration for the ceremony is required.

Transcripts: Transcripts are not automatically sent upon degree completion; rather, they must be ordered from the Office of the Registrar. When applicable, students should mark their transcript order form "hold for posting of degree" and indicate the quarter and degree awarded. Unofficial transcripts may be printed via GOLD.

Diplomas: Diplomas can take three to six months to be printed and mailed. The Registrar's office will automatically mail your diploma to your “diploma address” as soon as it arrives; therefore it is imperative that you update your Diploma Address in GOLD. A $7.00 mailing fee will automatically be accessed to your BARC account when your degree is awarded.

M. Department Policy on Probation and Dismissal

Students who fall below a cumulative grade point average (GPA) of 3.0 (B) will be automatically placed on probation by the Graduate Division. Probation is intended to provide students whose performance is less than satisfactory with a period of time in which to make up their deficiencies. Continued probation is recommended for a student who remains below the 3.0 level after one quarter if reasonable progress toward academic recovery has been demonstrated. Only the Dean of
Graduate Division may dismiss a student from graduate status. This is done on the recommendation of the Department. Dismissal is recommended for a student who fails to reach the 3.0 level after two consecutive quarters on probation.

In addition, students are required to maintain good academic standing and make continual progress towards the degree. This includes maintaining a 3.0 or above GPA, reaching degree milestones according to the requirements outlined in Section III (i.e. joining a research group by the end of the second quarter, forming a thesis committee by the end of the first year, advancing to candidacy by the end of the second year, completing the proposal exam by the end of the third year, and defending the dissertation within normative time standards), meeting annually with the thesis committee, adequately performing all of your teaching duties, joining a research group by the end of your second quarter, submitting the Free Application for Federal Student Aid (FAFSA) each year, and establishing California residency by the end of your first year. The Department may recommend that the Graduate Division place a student on academic probation for failing to comply with any of these components of good academic standing.

V. FINANCIAL AND EMPLOYMENT MATTERS

The majority of PhD students in the UCSB Department of Chemistry and Biochemistry graduate program are financially supported throughout their course of study. Admitted students will receive a competitive stipend for the first year of study. The current annual salary for students who have not yet advanced to candidacy is $27,000. Students who have advanced to candidacy receive an annual salary of $28,000 (annual salaries effective October 1, 2012). Sources of support include teaching assistantships, graduate student research assistantships, and/or fellowships. Students who do not maintain good academic standing may become ineligible for fellowships, employment, and other forms of financial support. Financial support includes the payment of tuition, fees and health insurance. A Summary of Quarterly Fees and Expenses for 2011-12 can be found on the Office of the Registrar's web site. See also the Graduate Division Financial Support web site for more information.

A. Free Application for Federal Student Aid (FAFSA)

As a public institution, large shares of UCSB’s fellowship funds are provided through financial aid monies. Information from the FAFSA is used to determine eligibility and fund sources for support packages. It is required that all domestic graduate students (including permanent residents) file the Free Application for Federal Student Aid (FAFSA) each year that they remain students at UCSB. The deadline for submitting the FAFSA is March 2nd. However, students are encouraged to file the application as soon as possible and late applications are accepted. Students may file the FAFSA electronically by accessing the web site or secure a hard copy from their local Financial Aid Office. At the FAFSA web site you can also find the Renewal FAFSA, designed for students who completed the FAFSA last year. If you file a Renewal FAFSA, many answers are based on your prior year’s application, which cuts down on the number of questions you have to complete. Be sure to list the University of California, Santa Barbara, in Step 6. Our school code number is 001320.

Upon receipt of your Financial Aid Award Letter (FAAL) in mid-September, a copy of your FAAL should be submitted to the DCB Student Affairs Office. If you are granted Work Study please visit
the Financial Aid Office web site (follow the link under Tab 4 of your FAAL) to print your Work Study Referral form or visit the Financial Aid Office (located in 2103 SAASB) to receive a copy. Your Work Study Referral Form should also be submitted to the DCB Student Affairs Office.

B. Fellowships

Graduate Division Central Fellowships by Departmental Nomination: Central fellowship awards for continuing students are based on nomination by the DCB Awards Committee and review by a Central Faculty Fellowship Committee. Students applying for nomination must submit a Statement of Purpose, Research Abstract, CV, letter of recommendation from the Primary Research Advisor, and any supplementary materials or information specific to the fellowship to which they are applying to the DCB Student Affairs Office. A complete summary of fellowship packages and nomination procedures will be sent to students in January or February. Students may access application materials on the Graduate Division web site. Complete applications will be due to gradprog@chem.ucsb.edu in late February or early March.

Graduate Division Central Fellowships by Student Application: Continuing students apply directly to the Graduate Division for the following fellowships.

- **Broida-Hirschfelder Dissertation Award**: Domestic and international students may apply. To be eligible for this award, the candidate must show academic promise and must have completed two years of graduate studies in his/her current Ph.D. program. Preference will be given to those who have advanced to candidacy. Please indicate any unusual or difficult circumstances you have had to, or continue to, overcome in the course of your education. Candidates must be either registered or on official leave in Spring Quarter of the current year. The award recipient must be registered for Fall quarter.

- **Brython Davis Endowment Graduate Fellowship**: Continuing UCSB graduate students in good academic standing and registered or on Official Leave of Absence in Spring Quarter of the current year may apply. Recipients must maintain continuous full-time enrollment and good academic standing at UCSB throughout the entire tenure of the award. One of the applicant's parents must be or have been a regular member of the U.S. Navy or Marine Corps.

- **Olivia Long Converse Graduate Fellowship**: Applicants must be UCSB graduate students and must have financial need. Continuing UCSB graduate students who are registered and in good standing or on Official Leave of Absence in Spring Quarter of the current year, may apply for a dissertation fellowship. Supportable areas of research are in one or more of the following areas with a strong preference for research in Mexico: systematic, floristic, vegetational, ecological and phytogeographic botany studies. Some applications will also be considered for research in botany in other areas; applicants may describe such studies in the statement of relevance. Activities not suitable for award include travel to increase familiarity with Mexico, photographic excursions and general plant collecting. Recipients must maintain continuous full-time enrollment and good academic standing at UCSB throughout the entire tenure of the award.

- **UCSB Affiliates Graduate Dissertation Fellowships**: The UCSB Affiliates is a community-based support group for the University of California, Santa Barbara. This group, with matching support from Graduate Division, will award fellowships of $3,000 each to graduate students in any discipline who are advanced to doctoral candidacy and in the final stages of the degree. Candidates must be either registered or on official Leave of Absence in
Spring Quarter of the current year. Awards are made on the basis of the quality of the proposed topic and the candidate's academic credentials. Awards will be decided by June of the current year. Presentation of awards will be scheduled for early Fall quarter. Award recipients must be registered for Fall quarter.

- **James D. Kline Fund for International Studies Award**: Students from all disciplines are eligible. Applicants may be U.S. citizens, permanent residents, or international students. Applicants must be registered graduate students in a University of California graduate program.

**Department-Administered Awards**: [Department-administered awards](#) for continuing students are based on nomination by a DCB Faculty Member and review by the DCB Student Awards Committee. Students may also self-nominate for certain awards. Complete information for each award and nomination procedures will be sent to students during spring quarter. Complete applications will be due to [gradprog@chem.ucsb.edu](mailto:gradprog@chem.ucsb.edu) in early April. Award recipients are honored at a department ceremony in June. The following departmental awards are available.

- **B. R. Baker Memorial Award**: The B.R. Baker Memorial Fellowship in Chemistry is awarded to a graduate student who has given strong indication that they will make continued and substantial contributions to the progress of organic, medicinal, or biological chemistry. Nominees must be advanced to doctoral candidacy and in the final stages of the degree. This award is announced at the annual B. R. Baker Memorial Lecture in the presence of Reba Baker, B. R.’s wife.

- **Jarrod Davidson Memorial Award**: The Jarrod Davidson Memorial Scholarship is awarded to a graduate student facing the special challenge of conducting excellent research while raising a family. This award is given to celebrate the memory in Jarrod Davidson, UCSB Chemistry PhD candidate from Fall 2003 through Spring 2004.

- **Outstanding Teaching Assistant Award**: The Outstanding Teaching Assistant Award recognizes graduate students who have made outstanding contributions to undergraduate education in chemistry and biochemistry. Teaching Assistant evaluations and comments submitted by undergraduate students will be considered as part of the nomination packet.

- **Undergraduate Enrichment Program Mentor Award**: Supported by contributions from Pfizer, Clorox, Amgen, Roche Bioscience, and the DeWolfe Family, this award provides a unique research and mentorship experience for undergraduates. Our best organic undergraduate students are paired with our best organic graduate students in a one-on-one lab experience. During 10 weeks, an undergraduate protégé shadows their graduate mentor, becoming absorbed into their project and group. Organic graduate students in their third, fourth, or fifth year who are interested in participating should inquire with their Primary Research Advisor. Students should plan to be supported with a GSR appointment while mentoring an undergraduate.

**Externally Sponsored Awards**: Fellowships awarded directly by the sponsoring agencies are usually publicized in professional journals and on bulletin boards in universities. Sometimes they do not come to the attention of many eligible candidates. As a result, students who may not fare well in the competition for university awarded fellowships could receive one of these fellowships. All superior graduate students are encouraged to apply, if eligible. Links to external national and international fellowship competitions are available via the [DCB](#) and [Graduate Division](#) web pages.

The [Corning Incorporated Foundation](#) sponsors a pre-doctoral fellowship each year in the field of materials science. Corning nominations are based on review by the DCB Student Awards Committee. Students applying for nomination must submit a Research Abstract, CV, and letter of
recommendation from the Primary Research Advisor to the DCB Student Affairs Office. A complete summary of fellowship information and nomination procedures will be sent to students in February. Complete applications will be due to gradprog@chem.ucsb.edu in early March.

C. Teaching Assistantships

The Department awards approximately 50-65 teaching assistantships per quarter. Most are 20 hour per week appointments. All students must hold teaching assistantships for at least 3 quarters (not necessarily consecutive quarters) to meet departmental Ph.D. degree requirement minimums, but most teach for an average of 4-6 quarters. The TA Oversight Committee determines course teaching assistant assignments in accordance with the DCB Rules for TA Assignment. Exceptions require advance approval from the Department Chair. Students typically hold Teaching Assistant appointments during the first and/or second year of graduate study. All students appointed for 25% time (10 hours per week) or more will be eligible for mandatory student health insurance and partial tuition and fee remission. Students are typically nominated for TA positions by their primary research advisor, but you may also self-nominate by emailing the Staff Graduate Program Advisor at least 6 weeks in advance of the quarter in which you wish to TA.

Eligibility: All new students must attend mandatory TA training sessions, campus-wide TA Orientation, and the required laboratory safety course during New Grad Academic Training in September. Any homework assignments associated with training must also be submitted at that time. Students will receive a TA Training Handbook during New Grad Academic Training, which should be retained and referenced for the duration of their studies at UCSB. New TAs are also required to enroll in Chemistry 501A-B-C and attend weekly TA meetings. Foreign students and permanent residents whose native language is not English must also pass the mandatory English for Multilingual Students (EMS) oral exam before being certified for sole classroom teaching.

To maintain eligibility for TA nominations, continuing students must maintain good academic standing and perform all TA duties adequately. Assessment of adequate TA performance will be determined by the instructor in charge of the course and submission of undergraduate evaluation forms. Students who do not meet eligibility standards for one or more quarters will not be selected for future TA positions and may be subject to academic probation until performance is determined to be adequately improved.

D. Graduate Student Researcher (GSR) Positions

Enrolled graduate students may seek employment up to 49% time as Graduate Student Researchers (GSRs). If appointed at least 25% time, mandatory health insurance and partial fee remission will be covered. If appointed 35% time or more, full fees and tuition coverage will be provided. These positions are paid by an extramural grant under the direction of a faculty member and are intended to support the research goals of the grant. The Principal Administrator of the grant awards all GSR appointments. These appointments are not administered through the DCB Student Affairs Office.

Students not employed as Teaching Assistants are typically employed as Graduate Student Researchers under the direction of the Primary Research Advisor, given that they remain in good academic standing. However, students may also seek GSR positions with other faculty members.
whose research interests are similar or related. Students are strongly encouraged to discuss employment and financial support opportunities with the Primary Research Advisor in advance.

E. Timecards

All hourly employees (including GSRs and Readers) are required to submit a monthly timecard to the DCB Administrative Office. Timecards are available for pick-up from the Payroll and Personnel Analyst (Building 232, Room 1003). It is the student’s responsibility to ensure that the PI signs the timecard and return it to the DCB Administrative Office once per month (typically on the 13th). Please DO NOT lose your timecard. Teaching Assistants will not be required to submit a timecard for payroll purposes, but in certain quarters the Staff Graduate Advisor may request that you complete one for data tracking purposes.

F. Equal Opportunity Policies and Procedures

UCSB's Office of Equal Opportunity & Sexual Harassment / Title IX Compliance maintains: “The University of California, in accordance with applicable federal and state laws and University policy, prohibits discrimination against or harassment of any person at the University on the basis of race, color, national origin, religion, sex, gender identity, pregnancy, physical or mental disability, medical condition (cancer-related or genetic characteristics), ancestry, marital status, sexual orientation, citizenship, or age. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, employment, access, and treatment in University programs and activities. The University of California also prohibits employment discrimination based on status as a covered veteran." UCSB's Office of Equal Opportunity & Sexual Harassment / Title IX Compliance web site should be consulted for complete policy and procedural information. Inquiries regarding the University’s equal opportunity policies may be directed to the Director and Title IX Officer, Ricardo A. Alcaino at x4505 or ricardo.alcaino@oeosh.ucsb.edu.

G. Establishing Residency

Out-of-state domestic graduate students whose duration of study at UCSB will exceed one year are advised to take the necessary steps to establish California residency (for determining assessment of nonresident tuition) immediately upon the first quarter of matriculation. The Department requires that nonresident domestic students and permanent residents establish California residency by the start of fall quarter of the second year. The Office of the Registrar determines the residency of new students and is the final authority on residency matters. Complete instructions are posted on their web site or they may be contacted at 893-3033 or regresid@sa.ucsb.edu.

H. P3 Status

There are 3 class levels designated for doctoral students by the Office of the Registrar: P1 (not yet advanced), P2 (advanced to candidacy), and P3. A student enters P3 status after 9 registered
quarters as P2 status. Students on P3 status are ineligible for teaching assistantships, reader positions, and fellowships.

I. Filing Fee Payment for Graduation in Lieu of Enrollment

A student must be in a fee relationship with the University in the quarter that he or she finishes all degree requirements. Fees paid for one quarter cover activities undertaken until the next quarter begins. Spring fees also cover Summer Sessions, until Fall quarter begins. In lieu of registering for courses, a student may choose to go on a filing quarter leave of absence during his or her last quarter of completing a Ph.D. or terminal master's degree. This type of leave allows the student to maintain the fee relationship without paying full student fees. When filing, you would pay a nominal fee; ½ of the registration fee for the quarter, currently $150. Students should refer to the Graduate Division Handbook for more details.

J. Financial Aid Information for Nonimmigrant Foreign Students

Part-Time Employment: Graduate non-immigrant foreign students are allowed to hold part-time on-campus academic titles such as Teaching Assistant, Reader, Graduate Student Researcher, etc. However, off-campus part-time jobs require prior written or documented authorization from the US immigration service or the Office of International Students and Scholars (OISS).

President's Work-Study: Limited financial assistance is available to a small percentage of continuing nonimmigrant foreign graduate students through the President’s Work-Study Program, administered by the Office of International Students and Scholars, in which students earn money by working on campus during the academic year or summer. Amounts of awards vary.

Teaching Assistant Loan, Emergency Loan: Information regarding TA and Emergency Loans can be found on the Financial Aid Office web site. TA Loans are available from the Financial Aid Office to alleviate financial hardships experienced by TAs during their initial period of employment. Emergency Loans allow students to receive an advance on their pending Financial Aid for the current quarter due to an emergency expense.

K. Research Travel Funds for Doctoral Students

The Academic Senate has a small travel fund for use by graduate students who have advanced to Ph.D. candidacy. Grants are made to doctoral students who are invited to present papers or results of research at major professional meetings and conferences. Student applications for travel funds must be accompanied by an abstract of the paper to be presented, a copy of the formal invitation, and a letter of support from the student’s advisor indicating the importance of the forum. The conference must be an important one to the discipline; preference will be given to travel associated with potential academic employment.
VI. HEALTH AND SAFETY

In addition to the specific information listed below, UCSB offers various additional services aimed at maintaining a safe environment and increasing students’ awareness and comfort. For example, students may sign up to receive campus alerts via the UCSB Alert System and request an escort via the CSO Escort Program when biking or walking at night. The campus community also includes the fully staffed UCSB Police Department and the UCSB Paramedic Rescue unit.

A. DCB Safety Practices and Policies

Department Responsibilities: The Department is responsible for ensuring safe practices and working conditions for all departmental personnel. All incoming graduate students must attend the Laboratory Safety Training course offered by the Environmental Health and Safety Office during New Grad Academic Training. In addition to this general safety training, every faculty advisor is responsible for ensuring specific safety training and practices with respect to research being conducted in the group. Material Safety Data Sheets (MSDS) describing the properties of various chemicals are available by request from Cabe Fletcher in the Graduate Storeroom or online.

Departmental First-Aid: First Aid cabinets are supplied by the Principal Investigator of each group and are located within the labs. Alex Moretto, Chemical Laboratory Safety Officer (CLSO), is the safety coordinator for the department. See the CLSO for information about first aid assistance. The Health and Safety Binder and Lab Operations Manual are available for review in the CLSO office (2660 PSB North).

Hazard Reporting: Unsafe working conditions should be reported to your faculty advisor or Elaine Merza and Lisa Stamper for instructional labs. Unsafe working conditions in any workspace should be reported to the Chemical Laboratory Safety Officer, the MSO, or the Chairperson. Forms for reporting hazards or unsafe conditions (anonymously if desired) are available online.

B. University Safety Practices and Policies

Environmental Health and Safety: The office of Environmental Health and Safety (EH&S) is committed to promoting a safe and healthful environment for research, instruction and the campus community. Through education, auditing and monitoring, technical consultation, and the provision of direct services, EH&S assists the campus in meeting its obligations for compliance with State and Federal health, safety and environmental regulations.

Injury and Illness Prevention Program (IIPP): The IIPP is the most important health and safety regulation/program on campus, and in California. The IIPP law is administered by the California Occupational Safety and Health Administration (Cal-OSHA). In short, this law requires employers to establish the following foundation safety program elements that apply to all workers regardless of their particular job duties:

1. Ensure that workers are trained in, and comply with, safe work practices
2. Inspect for and correct unsafe/unhealthy work conditions as soon as possible
3. Maintain documentation of all training and inspections
4. Encourage workers to report unsafe conditions (Hazard Reporting Form) without fear of reprisal
5. Communicate safety issues in a way that is understandable to all workers
6. Report and investigate all occupational injuries

C. Procedures for Handling and Reporting Incidents

Procedures for responding to fires, chemical exposure, and medical emergencies are outlined below. This information, as well as procedures concerning other emergency circumstances, is available in the UCSB Campus Emergency Flip Chart, which is posted on the wall of each lab and office. In the case of all emergencies or injuries, the incident should be reported to your supervisor or lab manager and the Department MSO, Chemical Laboratory Safety Officer, or Chairperson.

**Fires:** Know the location of fire extinguishers in your area and know how to use them. Fire extinguisher training is available for departments by request at 893-7751. For a minor fire that appears to be controllable, activate the building fire alarm system at the nearest manual fire alarm pull box. Immediately call 911 (or 9-911 from a campus phone). Then use the appropriate fire extinguisher to control the flames. Get help if necessary.

For a larger fire that is not easily controllable, close all doors to confine the fire and reduce oxygen. Activate the building fire alarm system at the nearest manual fire alarm pull box, then immediately call 911 (or 9-911 from a campus phone). Give all information requested (your name, exact location, size and progress of the fire, etc.). Notify your supervisor or instructor, then evacuate the building by quickly walking to the nearest exit, alerting people as you go, and assisting those with disabilities as necessary. Do not use elevators for evacuation. Once outside, move to a clear area at least 50 feet away from the affected building. Keep walkways and vehicle access clear for emergency vehicles. Utilize the designated building Emergency Assembly Point if it is free of smoke, and wait for instructions. DO NOT RETURN TO THE AFFECTED BUILDING UNTIL TOLD IT IS SAFE BY A CAMPUS FIRE OFFICIAL.

Report all fires, regardless of size to Campus Dispatch at 893-3446. Report any fire extinguisher that has been discharged, has lost pressure, or is out-of-date to Physical Facilities/ Life Safety Service at 893-2661, ext. 1402 for service.

**Chemical Exposure to Personnel:** If it is safe to do so, remove contaminated victim(s) from area. Call 911 (or 9-911 from a campus phone) for immediate medical attention, or if chemical release threatens others. In extreme circumstances, activate the fire alarm, and evacuate the building. Remove contaminated clothing and use emergency eyewash/shower. Administer first aid as appropriate. Notify the Chairperson or MSO and EH&S at 893-3194 (24 hr. phone line). Provide information, including Material Safety Data Sheets (MSDS) to emergency responders.

**Medical Emergencies:** Call 911 (or 9-911 from a campus phone), if the condition requires immediate medical attention. If poisoning is suspected, contact the Poison Control Center at 1-800-222-1222.

For UCSB employees (faculty and staff), it is important that all work related injuries be reported immediately. During regular business hours, contact Workers' Compensation at 893-8050 to report
injuries and to obtain an authorization for initial medical treatment. If a work-related injury occurs outside of normal work hours, contact the Workers’ Compensation office at 893-8050 within one business day. If an employee is hospitalized for 24 hours or more (other than for observation), or has an injury that results in a partial or full loss of limb (amputation), or loss of life, contact EH&S at 893-3194 (24 hr. phone line) immediately. The campus must report these injuries to OSHA within 8 hours of the event.

Undergraduates and graduate students (not staff/faculty) can be seen at Student Health Services (SHS) at 893-3371. If the victim needs immediate medical assistance, call 911 (or 9-911 from a campus phone). There is no charge for having the paramedics (9-911 from a campus phone) come out and evaluate the victim. If the victim needs to be transported to Student Health Services or a hospital emergency room there is a charge.

D. Substance Abuse and Smoking Policies

**Campus Smoking Policy:** All UCSB buildings are designated as non-smoking. Smoking is permitted outside buildings in open areas, but smokers must be at least twenty feet away from any building. Please be respectful of your colleagues and professors by recognizing that smoke carries through windows and vents on all floors of nearby buildings and many suffer from smoke inhalation allergies. All University-owned residence halls are smoke-free buildings, as are the privately owned residence halls.

The Alcohol & Drug Program, in collaboration with Santa Barbara County Public Health Department, offers FREE tobacco cessation services to all UCSB students! If you are thinking about quitting, click here for help.

**UCSB Substance Abuse Policy:** To promote an environment of academic excellence and to comply with the requirements of the Drug-Free Schools and Communities Act and the Drug Free Workplace Act, academic and staff employees and students:

- Shall not use illegal substances and shall not abuse legal substances in a manner that impairs scholarly activities, job performance, or student life.
- Shall not use illegal or legal substances in a manner that violates applicable criminal or civil laws in the workplace, on university premises, at university activities, or while conducting university business.
- Are prohibited from the unlawful manufacture, distribution, dispensation, possession or use of alcohol and/or a controlled substance in the workplace, on university premises, at university activities, or while conducting university business.

Students found guilty of violating the UCSB Substance Abuse Policy or the [Campus Regulations Applying to Campus Activities, Organizations, and Students](#) are subject to disciplinary sanctions which may include loss of privileges and exclusion from activities, warning, suspension, or dismissal. In addition to, or in lieu of a corrective action, a student may also be required to participate in an approved counseling or treatment program. The complete text of the [UC and UCSB Substance Abuse Policies](#) can be found online.
VII. CODES OF CONDUCT AND CONFLICT RESOLUTION

In order to carry on its work of teaching, research, and public service, the University has an obligation to maintain conditions under which the work of the University can go forward freely, in accordance with the highest standards of quality, institutional integrity, and freedom of expression, with full recognition by all concerned of the rights and privileges, as well as the responsibilities, of those who compose the University community. These campus regulations address the rights and responsibilities of members of the University community and provide campus-wide standards for implementing regulations as a means of sustaining this community. Each member of this campus shares the responsibility of maintaining this unique community so that the University’s mission of teaching, research, and public service can be achieved (from Campus Regulations Preamble).

A. Student and Faculty Codes of Conduct

**Students:** Graduate students are responsible for meeting not only the academic standards outlined here, but also standards for personal conduct and responsibility outlines in the General Catalog, the Graduate Division Graduate Handbook, and other UC publications. Students registered in the University of California assume an obligation to act in a manner compatible with the University’s function as an educational institution. Standards of Conduct and processes for reporting violations are outlined in Chapter VIII of the Campus Regulations.

**Faculty:** The University seeks to provide and sustain an environment conducive to sharing, extending, and critically examining knowledge and values, and to furthering the search for wisdom. Effective performance of these central functions requires that faculty members be free within their respective fields of competence to pursue and teach the truth in accord with appropriate standards of scholarly inquiry.

The faculty’s privileges and protections, including that of tenure, rest on the mutually supportive relationships between the faculty’s special professional competence, its academic freedom, and the central functions of the University. These relationships are also the source of the professional responsibilities of faculty members. It is the intent of the Faculty Code of Conduct to protect academic freedom, to help preserve the highest standards of teaching and scholarship, and to advance the mission of the University as an institution of higher learning (from the Faculty Code of Conduct Preamble).

B. Departmental Resources for Conflict Resolution

All members of the Department strive to maintain a positive and professional environment fostering constant growth and collegiality. However, the DCB is composed of a diverse group of individuals, each with unique personalities and opinions and who often work long hours together. We understand that conflicts will arise at times. When you are comfortable and safe doing so, you are encouraged to discuss potential disagreements with your colleagues or Primary Research Advisor and work toward agreeable solutions together. In cases where this is not possible, students should seek outside assistance as soon as the problem arises.
Staff Advisor: The Staff Graduate Program Advisor is available for advice and referral and serves as an initial point of contact for students wishing to vocalize and address concerns. The Staff Advisor can provide impartial feedback on the situation, suggest the role(s) that particular faculty members may play in providing assistance, or advise pursuit of a more formal grievance process if necessary.

Thesis Committee: Existing or potential issues should be presented during your annual thesis committee meeting for review and discussion. You may also call additional meetings of your committee members to address issues immediately as they arise. At your discretion, your Primary Research Advisor may or may not be present for supplemental meetings.

Department Chairperson and Faculty Graduate Advisor: When additional help, guidance, or conflict resolution is needed within the Department, the Chairperson or Faculty Graduate Advisor may be consulted. Either or both of these individuals may also attend regularly scheduled annual or supplemental thesis committee meetings at your request.

DCB Amicus Curiae (AC): Appointed by the Chairperson, the DCB Amicus Curiae is a member of the faculty who serves as an impartial “ombudsman” for the Department. The AC may be consulted at any point for open discussion about any question or concern. Conversations with the AC may be shared with the Staff Advisor when appropriate, but will otherwise be kept entirely confidential.

If information is disclosed during conversations with any departmental representative that implies or suggests a threat of danger or harm to any individual, confidentiality does not apply. The appropriate resource or authority will be contacted. IF YOU ARE IN A THREATENING OR UNSAFE SITUATION, SEEK HELP IMMEDIATELY.

C. Office of the Ombuds

The Office of the Ombuds assists the campus community with the informal resolution of any University-related complaint or conflict. They offer a safe and confidential place to discuss concerns, including workplace issues, interpersonal conflict, academic concerns, bureaucratic runarounds, and many other problems. The Office of the Ombuds supplements but does not replace existing resources for conflict resolution at UCSB. If you are not satisfied with informal attempts at resolving a conflict, you may choose to initiate a grievance process. The Ombuds can give you information about these types of formal processes but cannot handle or get involved with them. Consulting with the Office of the Ombuds is completely voluntary. All members of the University community have the right to speak with the Office. Retaliation for exercising that right will not be tolerated.

D. Office of Equal Opportunity & Sexual Harassment/Title IX Compliance

The Office of Equal Opportunity & Sexual Harassment / Title IX Compliance (OEOSH/TC) is the campus office responsible for the University’s compliance with federal and state laws and University policies and procedures regarding discrimination, retaliation and sexual harassment for students, staff and faculty. OEOSH/TC works to promote and integrate the principles of equal opportunity, affirmative action, nondiscrimination and excellence through diversity on campus.
VIII. CAMPUS SERVICES AND RESOURCES

UCSB is a unique close-knit community, servicing the needs of a highly diverse group of scholars, students, faculty, and staff. The following resources and services may be of particular interest to graduate students, but this list is by no means complete. The campus offers a wide variety of resources, services, information, and professional staff to help meet your needs throughout your academic career at UCSB. More comprehensive lists of student services can be found at the following links:

- MyUCSB
- UCSB Homepage - Current Students
- Graduate Division

A. DCB Graduate Web Pages

Links to requirement and policy information, required forms and petitions, campus services and resources, and financial and fellowship possibilities are available via the DCB graduate student web pages. Current, new, and prospective students may access a variety of DCB annual or quarterly reference materials and schedules, view frequently asked questions, and explore faculty research interests via this site. Students should utilize the Departmental graduate main web site as an initial point of reference for most questions.

B. ACCESS Card

The ACCESS card is the UCSB student identification and registration card. It is required to gain access to student services, such as Davidson Library and the Recreation Center. It also serves as your MTD bus pass (see section VIII-C "Transportation Services") and may be used as a debit card. ACCESS cards can be obtained at the ACCESS Card Center in the UCen on the main level. There is a one-time processing fee of $20. Students should bring proof of registration and a photo ID. If you lose your card, there is a replacement fee of $20. Visit the web site or call 893-7141 for more information.

C. Transportation Services

**Bus Stickers:** Use of the Santa Barbara MTD bus service is covered by each student’s registration fees and tuition. Once you have registered for at least 12 units, you should receive a message with the subject line "Sticker on Demand – Current Quarter" to your GOLD account (you must log-in to GOLD to view this message) with information regarding how to obtain your bus sticker. Place the sticker on your ACCESS card and present your card to the bus driver to ride free of charge. Information on Santa Barbara MTD and current bus schedules is available online.

**Parking Permits:** Rates for 2011-2012 are currently $432 for the year (July through June) and $339 for the academic year (Fall, Winter and Spring Quarters. Rates are subject to change. Please
refer to the [Parking Services website](#) for current rate information. Prices are pro-rated monthly. Fees are paid quarterly or annually at the Parking Services Office or online. Employed graduate students are eligible for a Staff (S) permit, but cannot apply until all employment paper work has been completely filled out and submitted.

**Transportation Alternatives Program**: The [Transportation Alternatives Program (TAP)](#) serves those who commute to UCSB by foot, skateboard, bicycle, bus, carpool, vanpool or train. By reducing traffic congestion, traffic emissions and the demand for parking on campus, we conserve energy and contribute to a better UCSB.

---

### D. Campus Libraries

The [main campus library](#) is Davidson Library, located at the center of campus across from the Arbor. The Arts Library is located in the west end of the Music Building. In addition to a large print collection, the UCSB library provides a host of electronic resources, including online catalogs, databases, and full text electronic journals. All of these electronic resources are available from anywhere on campus. Most can also be accessed from home or other off-campus locations with the use of the UCSB Proxy Server.

**Sciences-Engineering Library (SEL)**: The Sciences and Engineering section of Davidson Library is located on the north side of the second floor. It is well equipped with collections related to the natural and applied sciences, engineering, and technology. Chuck Huber (893-2762 or [huber@library.ucsb.edu](mailto:huber@library.ucsb.edu)) is the librarian for the DCB and is available to assist you with your research. He also teaches Chemistry 284 (Chemical Literature), which is designed to familiarize you with the library and online resources. This course, typically taught once per year during the winter quarter, is recommended for first year students.

---

### E. Student Health Services

[Student Health (SH)](#) is a primary health care facility that is available to all UCSB students. Students can use the medical services just as they would their regular doctor's office and urgent care center. The facility is fully accredited, staffed by board-certified physicians, nurse practitioners, physician assistants, advice nurses, dietitians, optometrists, dentists, physical therapists, pharmacists, lab, and X-ray technicians, social workers and counselors.

**University of California Student Health Insurance Plan (UC SHIP)**: This plan is an exclusive student insurance plan that is specific to the University of California, covering more than 130,000 students UC-wide. All students are automatically enrolled in UC SHIP upon registration at UCSB. Plan and coverage details are available via the [Student Health web site](#) or may be obtained from Student Health Services in person. Student Health may be reached at 893-5361 for general information or at 893-3371 for appointments.
F. Graduate Division

The Graduate Division is the center of all graduate studies at UCSB. Under Policies set by the UCSB Graduate Council, the Graduate Division recruits students and processes their applications to all graduate programs, promotes diversity at the graduate level, secures and awards graduate financial support, and administers graduate students' academic records (UCSB General Catalog, “Academic Units”).

Graduate Student Resource Center: Located in Student Resource Building, Room 1215, the Graduate Student Resource Center is a resource for graduate students seeking information, referral, and support throughout their programs of study. The Center offers events and workshops aimed at increasing student support.

Graduate Peer Advisors: UC Santa Barbara graduate students, both current and prospective, can take advantage of the services provided by the experienced graduate student peer advisors. These positions are housed in the Graduate Division, and although they take different approaches and address different audiences, they also work together to provide a comprehensive series of services for the graduate community. These unique positions exist in order to ensure a rewarding and high quality graduate school experience. They complement one another in that they each promote graduate student success.

G. General Catalog

The General Catalog is published online annually by the Office of the Registrar and serves as a guide and resource for all students at UCSB. The Catalog includes descriptions of all courses offered at UCSB during that academic year; University and campus policies, mission statement, accreditation statement, and general information; academic policies and procedures; college, department, and program-specific policies, requirements, and details; and financial information.

H. Office of the Registrar

The Office of the Registrar maintains official student records, registration and enrollment information, and annual and quarterly schedules and deadlines. Enrollment instructions, fee information, policies concerning grades, final exam schedules, transcript and verification information, instructions for establishing residency, and veterans benefits information can all be obtained via the Office of the Registrar online or in the Student Affairs and Administrative Services Building (SAASB), Room 1101. Forms associated with registration and credit exceptions, fees, special enrollment programs, and student record changes or inquiries are also available via the Office of the Registrar. In addition, the Office of the Registrar is the campus authority the Family Educational Rights and Privacy Act (FERPA), which protects a student’s right to privacy.
I. Community Housing Office

The **UCSB Community Housing Office (CHO)** is a one-stop resource for rental housing information and dispute resolution. Services include off-campus rental listings, landlord/tenant, neighbor, and roommate dispute resolution, a mediation program, advice and information about rental rights and responsibilities for tenants and property providers, educational workshops, publications and forms, and move-in/move-out videotaping. The Community Housing Office is located in the UCEN, room 3151. The CHO is a service provided by **Housing and Residential Services**.

J. Counseling Services

**Counseling Services** provides students with individual and group counseling as well as crisis intervention. Stress management services include relaxation rooms, self help materials, massage workshops, and a Test Anxiety program. Counseling Services maintains offices in the Student Resource Building, San Clemente, and the main office in Building 599 across from Storke Tower. For consultation or to make an appointment, call Counseling Services at 893-4411.

K. Career Services

Career Services is proud to offer a variety of services for graduate students. They recognize that, as graduate students, your career needs both intersect and diverge from those of undergraduates. Therefore, all resources, handouts, counseling services, and workshops are available for you. In addition, the Career Resource Room houses a collection of career-related books that address the concerns of graduate students, and every quarter they offer workshops focused on the specialized needs of graduate students. You are invited to peruse on-line resources through the Career Services webpage and also come in to visit them in person in Building 599 across the lawn from Storke Tower.

L. Involvement and Outreach Opportunities

**DCB Outreach Program:** Our [Fifth Grade Chemistry Outreach Program](#) is a partnership between local elementary students and teachers and UCSB students and faculty. To improve educational opportunities for K-12 students, we have developed a program that brings fifth grade students to the chemistry lab at UCSB every Thursday morning to participate in hands-on standards-based physical science activities. The program is designed to nourish their natural curiosity in science and to stimulate an interest in pursuing a higher education in science. In addition, UCSB students are given the opportunity to share their love of science with elementary students and to consider a career path as a science educator.

**SciTrek:** SciTrek is an outreach program run out of the DCB that focuses on allowing 2nd-5th grade students to experience science first hand by designing, carrying out, and presenting scientific experiments. SciTrek allows UCSB undergraduate and graduate students the opportunity to volunteer within the program.
Center for Science and Engineering Partnerships (CSEP): CSEP offers professional development seminars and workshops for science, engineering and math graduate students on a variety of topics including personal skill building; communicating science; teaching and mentoring; and career development. To hone these skills, graduate students can serve as mentors and/or teachers for K-12 students; community college and/or university undergraduates; and other community partners through our various programs. All of the programs organized by CSEP welcome graduate student participation. Those interested should refer to the online program descriptions and contact the appropriate coordinator.

Graduate Students for Diversity in Science (GSDS): Graduate Students for Diversity in Science is composed of an interdisciplinary group of young scientists at the University of California, Santa Barbara (UCSB). The cornerstone of the group lies in recognition of cultural heritage and diversity of many exceptional scientists who have set resilient foundations through research in their respective disciplines and across many boundaries. The group aims to foster a peer-to-peer mentorship atmosphere to promote research excellence and networking opportunities in academia and industry.

Women in Science and Engineering (WiSE): WiSE, a non-profit organization, was founded in Spring 2001 to promote equal opportunity for women and girls in science and engineering and improve their scientific and career advancement. WiSE encourages the participation of all science/engineering undergraduates, graduates, researchers, faculty, and professionals in the Santa Barbara area. WiSE hosts a weekly coffee hour, which serves as an informal event to socialize and recruit students who are interested in their activities.

Graduate Students’ Association (GSA): The Graduate Students’ Association is the elected representative government for UCSB graduate students. GSA is governed by an elected Executive Committee and a General Council of graduate student departmental representatives. As the voice of all graduate students at UCSB, there are a number of involvement opportunities for current students. In addition, the GSA lounge is open to students wishing to study or relax Monday, Tuesday, Wednesday, and Friday, 10am-5pm and Thursday, 10am-2pm.

M. Office of International Students and Scholars

The Office of International Students and Scholars (OISS) is the one place on campus that can assist you in all matters that relate to your visa status whether you hold an F-1 or J-1 visa. The OISS staff can answer your questions concerning how your academic program will affect your visa status. OISS can help you with questions about work or internships. They can help you in the event of an emergency. OISS is also the place to meet other international students. They can put you in touch with the international student associations on campus. OISS sponsors cultural events and workshops to enrich both your academic and social life. Their office has a lounge and computer stations that are available to international students during office hours.
