

Research Publications

118 research articles; more than 2980; h-index = 29; mean value of 28.4 citations per paper

1. *Experimental Investigation of Resonances in Reactive Scattering: F + H₂ reaction*, D. M. Neumark, A. M. Wodtke, G. N. Robinson, C. C. Hayden, Y. T. Lee, Phys. Rev. Lett. **53**(3), 226 (1984)
2. *Dynamic Resonances in the Reaction of Fluorine Atoms with Hydrogen Molecules*, D. M. Neumark, A. M. Wodtke, G. N. Robinson, C. C. Hayden, Y. T. Lee, ACS Symposium Series No. 263, "Resonances in Electron-Molecule Scattering, Van der Waals Complexes and Reactive Chemical Dynamics", D. G. Truhlar, ed. (1984)
3. *Molecular Beam Studies of the F + H₂ reaction*, D. M. Neumark, A. M. Wodtke, G. N. Robinson, C. C. Hayden, Y. T. Lee, J. Chem. Phys. **82**(7), 3045 (1985)
4. *Molecular Beam Studies of the F + D₂ and F + HD reactions*, D. M. Neumark, A. M. Wodtke, G. N. Robinson, C. C. Hayden, K. Shobatake, R. K. Sparks, T. P. Schaefer, Y. T. Lee, J. Chem. Phys. **82**(7), 3067 (1985)
5. *Photodissociation of Acetylene at 193.3 nm*, A. M. Wodtke, Y. T. Lee, J. Phys. Chem., **89**, 4744 (1985)
6. *The Observation of CH₃O in the collision free multiphoton dissociation of CH₃NO₂*, A. M. Wodtke, E. J. Hints, Y. T. Lee, J. Chem. Phys., **84**(2) 1044 (1986)
7. *Infrared Multiphoton dissociation of three nitroalkanes*, A. M. Wodtke, E. J. Hints, Y. T. Lee, J. Phys. Chem., **90**, 3549 (1986)
8. *Very High resolution photofragmentation translational spectroscopy*, A. M. Wodtke, Y. T. Lee, "Advances in Gas-Phase Photochemistry and Kinetics: Molecular Photodissociation Dynamics" M. N. R. Ashfold, J. E. Baggot eds., Royal Society of Chemistry, Series 539.6 QD561. (1987)
9. *State selective detection of CO using a tunable ArF laser*, G. Meijer, A. M. Wodtke, H. Schlueter, H. Voges, P. Andresen, J. Chem. Phys., **89**, 2588 (1988)
10. *Predissociation of O₂ in the B-state*, A. M. Wodtke, L. Huewel, H. Schlueter, H. Voges, G. Meijer, P. Andresen, J. Chem. Phys., **89**, 1929 (1988)
11. *High Sensitivity detection of NO in a flame using a tunable ArF laser*, A. M. Wodtke, L. Huewel, H. Schlueter, H. Voges, G. Meijer, P. Andresen, Optics Lett., **13**, 910 (1988)
12. *A simple way to improve a tunable ArF laser*, A. M. Wodtke, L. Huewel, H. Schlueter, P. Andresen, Rev. Sci. Instr. **60**, 801 (1989)
13. *The potential energy function for O₂ and the transition dipole moment the Schumann-Runge band near X-state dissociation*, X. Yang, A. M. Wodtke, J. Chem. Phys., **90**, 7114 (1989)

14. *Infrared multiphoton dissociation of ethyl and methyl acetate*, E. J. Hints, A. M. Wodtke, X. S. Zhao, Y. T. Lee, *J. Phys. Chem.* **92**, 5379 (1988)
15. *The photodissociation of vinylbromide and the heat of formation of the vinyl radical*, A. M. Wodtke, E. J. Hints, X. S. Zhao, *Israel J. Chem.*, **29**, 383 (1989) *Dynamics of Molecular Processes (Part A)* B. Gerber, A. Nitzan eds.
16. *Reply to comment on: predissociation of O₂ in the B-state*, A. M. Wodtke, L. Huewel, *J. Chem. Phys.*, **91**, 6540 (1989)
17. *Efficient State specific preparation of highly vibrationally excited NO*, X. Yang, A. M. Wodtke, *J. Chem. Phys.*, **92**, 116 (1990)
18. *The rotational structure of highly vibrationally excited HCN*, X. Yang, C. A. Rogaski, A.M. Wodtke, *J. Chem. Phys.*, **92**, 2111 (1990)
19. *Vibrational structure of highly vibrationally excited HCN up to 18,900 cm⁻¹*, X. Yang, C. A. Rogaski, A.M. Wodtke, *J. Opt. Soc. Am. B*, **7**, 1835 (1990)
20. *Reply to Comment on: Highly vibrationally excited HCN*, X. Yang, A. M. Wodtke, *J. Chem. Phys.*, **93**, 3723 (1990)
21. *The Vibrational quantum number dependence of Nitric Oxide self relaxation up to v'' = 25*, X. Yang, E. H. Kim, A. M. Wodtke, *J. Chem. Phys.*, **93**, 4483 (1990)
22. *Position Sensitive Detection with Laser induced fluorescence*, L. Huewel, A. M. Wodtke, P. Andresen, H. Voges, XVI ICPEAC proceedings, New York (1989)
23. *Application of tunable excimer lasers in the study of highly vibrationally excited molecules*, X. Yang, C. A. Rogaski, E. H. Kim, D. McGuire, A. M. Wodtke, *Lambda Physics Highlights*, **24**, 1 (1990)
24. *Production and Photodissociation of CCl₃ Radicals in a molecular beam*, E. J. Hints, X. Zhao, W. M. Jackson, W. B. Miller, A. M. Wodtke, Y. T. Lee, *J. Phys. Chem.*, **95**, 2799 (1991)
25. *Observation of Orbit Rotation predissociation in the O₂ Schumann Runge system*, X. Yang, A. M. Wodtke, *J. Chem. Phys.*, **94**, 2469 (1991)
26. *Quantum state specific time of flight measurements on CO*, J. M. Price, A. Ludvikson, M. Hsu, S. Hongo, R. M. Martin, A. M. Wodtke, *J. Chem. Phys.*, **96**, 1854 (1992)
27. *Vibrational Energy Transfer of highly vibrationally excited NO*, X. Yang, E. H. Kim, A. M. Wodtke, *J. Chem. Phys.*, **96**, 5123 (1992)
28. *State-to-state spin-orbit and rotational energy transfer in very highly vibrationally excited nitric oxide*, X. Yang, A. M. Wodtke, *J. Chem. Phys.*, **96**, 5111 (1992)

29. *Vibrational Energy Transfer in the Chemical Energy Regime using Stimulated Emission Pumping*, X. Yang, E. Kim, A. Wodtke, SPIE Conference Proceedings, Los Angeles California, 1992
30. *Efficient State specific preparation of $^{15}\text{N}^{18}\text{O}$* , X. Yang, D. McGuire, A. M. Wodtke, J. Mol. Spectrosc. **154**, 361 (1992)
31. *Axis Switching Transitions and the stimulated emission pumping spectrum of HCN*, D.M. Jonas, X. Yang, A. M. Wodtke, J. Chem. Phys., **97**, 2284 (1992)
32. *Controlling the Quantum Numbers in Chemical Reactions: Reactivity and Energy Transfer of Highly Vibrationally Excited Molecules*, X. Yang, A. M. Wodtke, International Reviews of Physical Chemistry, David Clary, Editor vol. **12**, No. 1 pp.123-147 (1993)
33. *Application of Synchrotron Radiation in Chemical Dynamics*, P. Heimann, M. Koike, A. Kung, C. Y. Ng, A. M. Wodtke, Workshop Report, February 5-6, 1993, Claremont Hotel Berkeley, California, LBL report-34131, CONF-9302-107, May 1993
34. *Stimulated Emission Pumping Studies of Energy Transfer in Highly Vibrationally Excited Molecules*, X. Yang, J. M. Price, J. A. Mack, C. G. Morgan, C. A. Rogaski, D. McGuire, E. H. Kim, A. M. Wodtke, **Feature Article**: J. Phys. Chem., **97**, 3944 (1993)
35. *Vibrational state specific vibrational self-relaxation rate constants for highly vibrationally excited O_2 ($\nu=19-28$)*, J.M. Price, J.A. Mack, C.A. Rogaski, A.M. Wodtke, Chem. Phys. **175**, 83 (1993)
36. *Laboratory evidence for a possible non-LTE mechanism of stratospheric ozone formation*, C. A. Rogaski, J. M. Price, J. A. Mack, A. M. Wodtke, Geophys. Res. Lett. **20**, 2885 (1993)
37. *Molecular Beam Stimulated Emission Pumping Spectroscopy of Propynal*, C. A. Rogaski, A. M. Wodtke, J. Chem. Phys., **100**, 78 (1994)
38. *Coherent Cavity Ring Down Spectroscopy*, G. Meijer M. G. H. Bogaarts, R. T. Jongma, D. H. Parker, A. M. Wodtke, Chem. Phys. Lett., **217**, 112 (1994)
39. *The Structure of Acetaldehyde in its First Excited Singlet State: Experiment and Theory*, J. M. Price, J. Mack, G. v. Helden, X. Yang, A. M. Wodtke, J. Phys. Chem., **98**, 1791 (1994)
40. *The "Ozone Deficit" Problem: Observation of an $\text{O}_2(X, \nu \geq 26) + \text{O}(^3P)$ Channel in the 226-nm Photodissociation of Ozone*, R. L. Miller, A. G. Suits, P. L. Houston, R. Toumi, J. A. Mack, A. M. Wodtke, Science, **265**, 1831 (1994)
41. *The first vibronically-resolved measurement of correlated-product-state distributions in ultraviolet photodissociation: ketene at 308 nm*, Marcel Drabbels, Christopher G. Morgan, David S. McGuire, Alec M. Wodtke, J. Chem. Phys., **102**, 611 (1995)
42. *High Resolution Spectroscopy of Chemical Isomerization: Stimulated Emission Pumping of HCN*, D. Jonas, X. Yang, C. A. Rogaski, A. M. Wodtke, Advanced Series in Physical

- Chemistry vol. 4: Molecular Dynamics and Spectroscopy by Stimulated Emission Pumping, pp. 513-541, Eds. R. W. Field, H. L. Dai, World Scientific, London
43. *How Does Collisional Energy Transfer Depend on Vibrational Excitation: Transient Chemical Bond Formation versus Chemical Reaction*, X. Yang, J. M. Price, J. A. Mack, C. G. Morgan, C. A. Rogaski, A. M. Wodtke, Advanced Series in Physical Chemistry vol. 4: Molecular Dynamics and Spectroscopy by Stimulated Emission Pumping, pp. 619-657, Eds. R. W. Field, H. L. Dai, World Scientific, London
 44. *Energy transfer of molecules with chemically significant amount of vibrational energy*, X. Yang, J. M. Price, J. A. Mack, C. A. Rogaski, C. G. Morgan, A. M. Wodtke, *Advances in Chemical Kinetics and Dynamics*, **2A**, 105 (1995)
 45. *The Spin-Forbidden $a^4\Pi(v=13-15)$ and $b^4\Sigma^-(v=3) \leftarrow X^2\Pi(v=0)$ Bands of Nitric Oxide: A new Scheme for Quantum State-Specific High-Resolution Kinetic Energy Measurements*, M. Drabbels, C. G. Morgan, A. M. Wodtke, *J. Chem. Phys.*, **103**, 7700 (1995)
 46. *Quantum-State-Specific Time-of-Flight as a probe of CO Photodesorption from GaAs(100)*, Matt Nooney, J. M. Price, R. M. Martin, A. M. Wodtke, *Chem. Phys. Lett.*, **245**, 377 (1995)
 47. *Reactive $O_2(v \geq 26)$ as a source of stratospheric O_3* , R. Toumi, P. L. Houston, A. M. Wodtke, *J. Chem. Phys.* **104**, 775 (1996)
 48. *The correlated product state distribution of ketene photodissociation at 308 nm*, C. G. Morgan, M. Drabbels, A. M. Wodtke, *J. Chem. Phys.* **104**, 7460 (1996)
 49. *The Electric Dipole Moment and Hyperfine Structure of NO $B^2\tilde{\alpha}^-$: High Resolution Laser-Induced Fluorescence Spectroscopy of the $B^2\Pi(v=3-5) \leftarrow X^2\Pi(v=0)$ Bands*, M. Drabbels and A.M. Wodtke, *Chem. Phys. Lett.* **256**, 8 (1996)
 50. *State-to-state rate constants for relaxation of highly vibrationally excited O_2 , and implications for its atmospheric fate*, C. A. Rogaski, J. A. Mack, A. M. Wodtke, *Faraday Discussion (Atmospheric Chemistry)* **100** 229 (1996)
 51. *Molecular Energy Transfer*, G. Flynn, C. Parmenter and A. M. Wodtke, *J. Phys. Chem.* **100**, 12817 (1996)
 52. *State-specific neutral time-of flight of CO from ketene photodissociation at 351 nm: The internal energy distribution of $CH_2(X^3B_1)$* , C.G. Morgan, M. Drabbels, A. M. Wodtke, *J. Chem. Phys.*, **105**, 4550 (1996)
 53. *The product vibrational, rotational and translational energy distribution for the reaction $O(^3P_J) + O_3 \rightarrow 2O_2$: Break down of the spectator bond mechanism*, J. A. Mack, Yuhui Huang, A. M. Wodtke, G. C. Schatz, *J. Chem. Phys.* **105**, 7495 (1996)
 54. *Resonant vibration-vibration energy transfer between highly vibrationally excited $O_2(X^3\Sigma_g^-, v=15-26)$ and CO_2, N_2O, N_2 and O_3* , J.A. Mack, K. Mikulecky and A.M. Wodtke, *J. Chem. Phys.*, **105**, 4105 (1996)

55. *Alignment of $D_2(v,J)$ desorbed from Cu(111): Low sensitivity of activated dissociative chemisorption to approach geometry*, S.J. Gulding, A.M. Wodtke, H. Hou, C.T. Rettner, H.A. Michelsen, D.J. Auerbach, *J. Chem. Phys.* **105**, 9702 (1996)
56. *Chemical reaction dynamics using the Advanced Light Source*, Yang, X., Blank, D.A., Lin, J., Heimann, P.A., Wodtke, A.M., Lee, Y.T., Suits, A.G. in *Synchrotron Radiation techniques in Industrial Chemical and Material Science*, Edited by D'Amico et al. , (Plenum Press, New York, 1996)
57. *The determination of the infrared radiative lifetimes of a vibrationally excited neutral molecule using stimulated-emission-pumping, molecular-beam time-of-flight*, M. Drabbels, A. M. Wodtke, *J. Chem. Phys.* **106**, 3024-3028 (1997)
58. *Laser excited metastable spectroscopy of acetylene in the 5.5 - 5.7 eV region*, Susan J. Humphrey, Christopher G. Morgan, Alec M. Wodtke, Kevin L. Cunningham, Stephen Drucker, and Robert W. Field, *J. Chem. Phys.* **107**, 49 (1997)
59. *The Stereo-dynamics of a Gas-Surface Reaction*, H. Hou, S.J. Gulding, C.T. Rettner, D.J. Auerbach, A.M. Wodtke, *Science*, **277**, 80 (1997)
60. *Parity-resolved state-to-state cross-sections for inelastic scattering of $NO X^2\Pi_{1/2}(v = 20, J = 0.5, e/f)$ from He: A comparison between crossed molecular beams experiments and ab initio theory*, Marcel Drabbels, Alec M. Wodtke, Moonbong Yang and Millard H. Alexander, *J. Phys. Chem.*, **101**, 6463 (1997)
61. *Advances in the measurement of correlation in photoproduct motion*, Christopher G. Morgan, Marcel Drabbels and Alec M. Wodtke, *Advances in Photochemistry*, vol. 23, pp. 279-350, 1997, Eds. D. Neckers, D. Volman, G. Von Bunau John Wiley and Sons, New York
62. *Anisotropic Translational Cooling: Velocity Dependence of Collisional Alignment in a Seeded Supersonic Expansion*, Steven Harich and Alec M. Wodtke, *J. Chem. Phys.* **107**, 5983 (1997)
63. *A Universal Crossed Molecular Beams Apparatus with Synchrotron Photo-ionization Mass Spectrometric Product Detection*, X. Yang, D. A. Blank, J. Lin, A. G. Suits, Y. T. Lee and A.M. Wodtke, *Rev. Sci. Instrum.*, **68**, 3317 (1997)
64. *Infrared and collisional relaxation of highly vibrationally excited NO: Applications of stimulated emission pumping in crossed and "uncrossed" molecular beams*, Marcel Drabbels and Alec M. Wodtke, in *Highly Excited Molecules: Relaxation, Reaction and Structure*, Eds. A.S. Mullin, G.C. Schatz, ACS Symposium Series, v. 678, p. 173 (1998)
65. *Rotational motion compensates the energy defect in near-resonant vibration-vibration energy transfer*, M. Drabbels, A.M. Wodtke, *J. Chem. Phys.* **109**, 355-258 (1998)
66. *Rapid evaporative cooling suppresses fragmentation in mass spectrometry: Synthesis of "Unprotonated" water cluster ions*. Rienk T. Jongma, Yuhui Huang, Shiming Shi, and Alec M. Wodtke, *J. Phys. Chem.* **A102**:8847-8854 (1998)

67. *Molecular Square Dancing: Correlated product motion in photodissociation*, Marcel Drabbels, Christopher G. Morgan, Alec M. Wodtke, Proc. SPIE-Int. Soc. Opt. Eng., **271**:51-63 (1998)
68. *Chemical Dynamics at the Advanced Light Source: Program Retreat Report*, T. Baer, C. Fadley, C.B. Moore, D.M. Neumark, C.Y. Ng, B. Ruscic, N.V. Smith, A.G. Suits, A.M. Wodtke, Lawrence Berkeley Laboratory Report Number LBNL-42816, Available to the public from the National Technical Information Service, US Dept. of Commerce 5285 Port Royal Road, Springfield VA 22161
69. *Determination of rotational polarization using 1+1' REMPI: A case study of D₂ associative desorption from Cu(111)*, H. Hou, S.J. Gulding, C.T. Rettner, A.M. Wodtke, D.J. Auerbach, J. Electron Spectrosc., **98-99**, 133-138 (1999);
70. *Direct multi-quantum relaxation of highly vibrationally excited NO in collisions with an O-covered Copper surface*, H. Hou, Y. Huang, C.T. Rettner, S.J. Gulding, D.J. Auerbach, A.M. Wodtke, J. Chem. Phys. **110**, 10660-10663 (1999).
71. *Enhanced Reactivity of Highly Vibrationally Excited Molecules on Metal Surfaces*, H. Hou, Y. Huang, S.J. Gulding, C.T. Rettner, D.J. Auerbach A.M. Wodtke, Science **284**, 1647-1650 (1999)
72. *Electronic non-adiabaticity in highly vibrationally excited O₂(X³Σ_g⁻): Large spin-orbit coupling between X³Σ_g⁻ and b¹Σ_g⁺*, Rienk T. Jongma, Shiming Shi and Alec M. Wodtke, J. Chem. Phys. **111**, 2588 (1999)
73. *Collisions and chemistry of super-excited molecules: experiments using the PUMP - DUMP - PROBE technique*, Marcel Drabbels and Alec M. Wodtke, Feature Article for J. Phys. Chem. , **103** 7142-7154 (1999)
74. *The Interaction of Highly Vibrationally Excited Molecules with Surfaces: Vibrational Relaxation and Reaction of NO(v) at Cu(111) and O/Cu(111)*, H. Hou, C. T. Rettner, D. J. Auerbach, Y. Huang, S.J. Gulding, A.M. Wodtke, Faraday Discuss. **113**, 181-199 (1999)
75. *Fast multi-quantum vibrational relaxation of highly vibrationally excited O₂*, Rienk T. Jongma and Alec M. Wodtke, J. Chem. Phys., **111**, 10957-10963 (1999)
76. Mathematica notebook to calculate Wigner 9-J Symbols, A.M. Wodtke, Joshua Halpern, <http://library.wolfram.com/database/MathSource/481/> December, 1999.
77. *Observation of vibrational excitation and de-excitation for NO(v=2) scattering from Au(111): Evidence for electron-hole pair mediated energy transfer*, Y. Huang, A.M. Wodtke C.T. Rettner, and D.J. Auerbach, Phys. Rev. Lett. **84** 2985-8 (2000)
78. *Vibrational Promotion of electron transfer*, Y. Huang, S.J. Gulding, C.T. Rettner, D.J. Auerbach A.M. Wodtke, Science **290**, 111-114 (2000)
79. *Rotational Analysis of the origin and the inversion bands in the S₁ ← S₀ spectrum of acetaldehyde*, E. Jalviste, G. Berden, M. Drabbels, A. M. Wodtke, J. Chem. Phys. **114**(19) 8316-27 (2001)

80. *Dipole moments of highly vibrationally excited HCN: theoretical prediction of an experimental diagnostic for delocalized states.* Joel M. Bowman, Stephen Irle, Keiji Morokuma, Alec Wodtke, Journal of Chemical Physics **114**(18) 7923-34 (2001)
81. *The Dynamics of “Stretched Molecules”: Experimental Studies of Highly Vibrationally Excited Molecules With Stimulated Emission Pumping,* Michelle Silva, Rienk Jongma, Robert W. Field Alec M. Wodtke, Annual Reviews of Physical Chemistry **52**, 811-852 (2001)
82. *Chemistry with stretched molecules,* Alec Wodtke, Phys. Chem. Earth (C) **26**(7), 467-471 (2001)
83. *Bridging the cluster-to-bulk divide: Electron attachment time-of-flight mass spectrometry reveals geometrical shell closings in SF₆ clusters,* Oddur Ingolfsson, Alec M. Wodtke, Phys. Rev. Lett. **87**, 183401 (2001). Cited as Editors Choice in Science **294** 748 (2001)
84. *Laser Desorption electron attachment time-of-flight mass spectrometry: a new means of analysis for involatile compounds,* Oddur Ingolfsson, Alec M. Wodtke Journal of the American Society of Mass Spectrometry **12**:12 1339-47 (2001).
85. *A new Approach to ¹³C isotope separation,* Nils Hansen and Alec M. Wodtke, Chemical Physics Letters **356**:3-4, 340-346 (2002)
86. *Electron attachment time-of-flight mass spectrometry reveals fcc bulk-like packing in CO₂ aggregates,* Oddur Ingolfsson and Alec M. Wodtke, Chemical Physics Letters **360**:1-2, 415-21 (2002)
87. *Electron attachment time-of-flight mass spectrometry reveals geometrical shell closings in van der Waals aggregates,* Oddur Ingolfsson and Alec M. Wodtke, Journal of Chemical Physics **117**:8 3721-3732 (2002)
88. *Non-Arrhenius Surface Temperature Dependence in Vibrational Excitation of NO on Au(111): Evidence for the Importance of Surface Electronic States,* Alec M. Wodtke, Huang Yuhui, Daniel J. Auerbach, Chemical Physics Letters **364**(3-4) 231-236 (2002).
89. *Photodissociation Dynamics of ClN₃ at 203 nm: The NCl (a ¹Δ / X ³Σ) Product Branching Ratio,* N. Hansen and A. M. Wodtke, A. V. Komissarov and M. C. Heaven, Chemical Physics Letters **368** 568–573 (2003).
90. *Radiative relaxation and isomeric branching of highly excited H/C/N: The importance of delocalized vibrational states,* T. Barger, A.M. Wodtke, J.M. Bowman, Astrophysical Journal, **587** 841-846(2003)
91. *Interaction of NO(v=12) with LiF(001): Anomalously large vibrational relaxation rates,* Alec M. Wodtke and Yuhui Huang, Daniel J. Auerbach, Journal of Chemical Physics **118**(17) 8033-41 (2003)
92. *Ion Dissociation Dynamics of the Chlorine Azide Cation (ClN₃⁺) Investigated by Velocity Map Imaging,* N. Hansen, A. V. Komissarov, K. Morokuma, M. C. Heaven and A. M. Wodtke, Journal of Chemical Physics **118** 10485-10493 (2003)

93. *Transport and focusing of highly vibrationally excited NO molecules*, Daniel Matsiev, Jun Chen, M. Murphy, A.M. Wodtke Journal of Chemical Physics **118** 9477-9480 (2003)
94. *Velocity map ion imaging of ClN₃ photolysis: Evidence of photolytic production of cyclic-N₃*. N. Hansen and A. M. Wodtke, Journal of Physical Chemistry (Charles Parmenter Festschrift) **107**(49), 10608-10614 (2003).
95. *Hexapole focusing of vibrationally excited molecules prepared by optical pumping*, Jun Chen, Jason White, Daniel Matsiev, Michael Murphy, Alec M. Wodtke, Chem. Phys. **301**(2-3) 161-172 (2004)
96. *The Cl to NCl branching ratio in 248-nm photolysis of chlorine azide*, Alec M. Wodtke, Nils Hansen, Niels Sveum, Jason Robinson, Scott Goncher and Daniel M. Neumark, Chem. Phys. Lett. **391** 334-337 (2004).
97. *Invited Review in the International Reviews of Physical Chemistry*. "Electronically non-adiabatic interactions of molecules at metal surfaces: Can we trust the Born-Oppenheimer approximation for surface chemistry?" Alec M. Wodtke, John C. Tully, Daniel J. Auerbach, International Reviews in Physical Chemistry, **23**(4), 513-539 (2004).
98. Invited Chapter for Advanced Series in Physical Chemistry, World Scientific, Chuik Ng Series Editor, "Modern Trends in Chemical Reaction Dynamics Part II: Experiment and Theory". Ed.'s Xueming Yang and Kopin Liu, "Interactions of vibrationally excited molecules at surfaces: A probe for electronically non-adiabatic effects" Alec M. Wodtke, vol. **14**, 383-408 (2005).
99. *High Level ab initio studies of unimolecular dissociation of ground state N₃ radical*, Peng Zhang, Keiji Morokuma, Alec M. Wodtke, J. Chem. Phys. **122**, 014106-1-11 (2005)
100. *Conversion of large amplitude vibration to electron excitation at a metal surface*, J. White, J. Chen, D. Matsiev, D.J. Auerbach and A.M. Wodtke, Nature **433**(7025),503-505, (2005).
101. *Vibrationally promoted emission of electrons from low work-function surfaces: Oxygen and Cs surface coverage dependence*, J. White, J. Chen, D. Matsiev, D.J. Auerbach and A.M. Wodtke, Journal of Vacuum Science and Technology **23**, 1085-1089 (2005)
102. *Two photoionization thresholds of N₃ produced by ClN₃ photodissociation at 248 nm: Further evidence for cyclic N₃*, Petros Samartzis, Jim Jr-Min Lin, Tao-Tsung Ching, Chanchal Chadhuri, Yuan T. Lee and Alec M. Wodtke, J. Chem. Phys., **123**, 051101 (2005)
103. *Insensitivity of molecular trapping at surfaces to vibration*. Alec M. Wodtke, Daniel J. Auerbach, Huang Yuhui, Chem. Phys. Lett. **413** 326-330 (2005)
104. *Photofragment Translational Spectroscopy of ClN₃ at 248 nm: Determination of the Primary and Secondary Dissociation Pathways*. N. Hansen, A.M. Wodtke, S. J. Goncher, J. Robinson, N. Sveum, D. M. Neumark, J. Chem. Phys., **123** (10): Art. No. 104305 (2005)

105. *Observation of orientational influences on vibrational energy transfer at metal surfaces: Rotational Cooling Associated with Vibrational Relaxation at a Metal Surface*, Alec M. Wodtke, Daniel J. Auerbach, Huang Yuhui, Chem. Phys. Lett. **414** (1-3): 138-142 (2005)
106. *Using Volatile Solvents for Ion formation in Liquid Molecular Beam Expansion Mass Spectrometry*, Qiang Zhang and Alec Wodtke Anal. Chem. **77** (23) 7612-7617 (2005)
107. *Vibrationally-promoted electron emission from low work function metal surfaces*, Jason D. White, Jun Chen, Daniel Matsiev, Daniel J. Auerbach, Alec M. Wodtke. J. Chem. Phys. **124**(6): Art. No. 064702 (2006)
108. *An experimental and theoretical study of ring closing dynamics in HN_3* , Jianyang Zhang, Yuan Chen, Kaijun Yuan, Steven A. Harich, Xiuyan Wang, Xueming Yang, Peng Zhang, Zhi Wang, Keiji Morokuma and Alec M. Wodtke *Physical Chemistry Chemical Physics*, **8**, 1690 – 1696 (2006)
109. *Chemistry in a Computer: Advancing the *in silico* Dream*, Alec M. Wodtke, Science **311**, 64-65 (2006)
110. *Imaging ClN_3 photodissociation from 234 to 280 nm* Peter C. Samartzis, Nils Hansen, and Alec M. Wodtke, Phys. Chem. Chem. Phys., **8**, 2958 – 2963 (2006)
111. *The heat of formation of chlorine-isocyanate and the relative stability of isoelectronic molecules: an experimental and theoretical study.* Yuanyuan Ji, Petia Bobadova-Parvanova, Chris Larson, Petros Samartzis, Keiji Morokuma, Jim Jr-Min Lin, Tao-Tsung Ching, Chanchal Chaudhuri, Shih-Huang Lee and Alec M. Wodtke, J. Chem. Phys. **124**(24), Art. No. 241106 (2006)
112. *Collision-free photochemistry of methylazide: Observation of unimolecular decomposition of singlet methylnitrene*, Christopher Larson, Yuanyuan Ji, Petros Samartzis, Alec M. Wodtke, Shih-Huang Lee, Jim Jr-Min Lin, Chanchal Chaudhuri, and Tao-Tsung Ching J. Chem. Phys. **125**, 133302 (2006)
113. *All-nitrogen chemistry: How far are we from N_{60} ?* Petros C. Samartzis and Alec M. Wodtke, *International Reviews in Physical Chemistry*, **25** (4): 527-552 (2006).
114. *The Simplest all-Nitrogen Ring: Photolytically filling the cyclic- N_3 well* Petros Samartzis, Jim Jr-Min Lin, Tao-Tsung Ching, Chanchal Chaudhuri, Shih-Huang Lee and Alec M. Wodtke *J. Chem. Phys.* **126** (4) Art. No. 041101 (2007)
115. *Direct translation-to-vibrational energy transfer of HCl on Gold: Measurement of absolute vibrational excitation probabilities*, Qin Ran, Daniel Matsiev, Daniel J. Auerbach, Alec M. Wodtke, *Proceedings of the 16th International Workshop on Inelastic Ion-Surface Collisions; Nuclear Instruments and Methods in Physics Research, Section B: Beam Interactions with Materials and Atoms (NIMB)* **258**(1) 1-6 (2007)
116. *Change of vibrational excitation mechanism in HCl/Au collisions with surface temperature: transition from electronically adiabatic to non-adiabatic behavior*, Q. Ran, D. Matsiev, D. J. Auerbach, A. M. Wodtke, *Physical Review Letters* **98**(23), 237601 (2007)

117. *Casting a new light on azide photochemistry: Photolytic production of cyclic-N₃*. Peter C. Samartzis, and Alec M. Wodtke, Invited Review Article for *Phys. Chem. Chem. Phys.*, **9**, 3054 – 3066 (2007)

Accepted or in press

118. *Dissociative photoionization of ClN₃ using high-resolution synchrotron radiation: The N-Cl bond energy in ClN₃*, Alfredo Quinto, Yin-Yu Lee, Tzu-Ping Huang, Wan-Chen Pan, Jim Jr-Min Lin, Petia Bobadova-Parvanova, Keiji Morokuma, Petros Samartzis, and Alec M. Wodtke (accepted in *International Journal of Mass Spectrometry* special issue to honor Dr. Jean H. Futrell.)

Submitted manuscripts

119. *An advanced molecule-surface scattering instrument for study of vibrational energy transfer in gas-solid collisions*, Qin Ran, Daniel Matsiev, Daniel J. Auerbach, Alec M. Wodtke (submitted to *Rev. Sci. Instrum.*)
120. *Observation of photochemical C-N bond cleavage in CH₃N₃, a new photochemical route to cyclic-N₃*, Chris Larson, Yuanyuan Ji, Peter C. Samartzis, Jim Jr-Min Lin, Tao-Tsung Ching, Chanchal Chaudhuri, Alec M. Wodtke, in preparation for *J. Chem. Phys.*
